

## USB C to VGA Adapter Cable (M/M), Thunderbolt™ 3 Compatible, 1920 x 1200 (1080p), 3 ft.

MODEL NUMBER: **U444-003-V**

### Description

The U444-003-V USB 3.1 Gen 1 to VGA DisplayPort Alternate Mode Adapter Cable supports USB DisplayPort Alternate Mode for displaying video on an existing VGA television, monitor or projector via your computer, tablet, laptop or smartphone's USB-C or Thunderbolt™ 3 port.

An ideal tool for multitasking, viewing large spreadsheets, editing documents, giving presentations at trade shows and conferences, or playing games and watching movies on large screens, this cable saves you the time, effort and expense of additional adapters and cables.

You can extend video from your primary display to another, duplicate the same video on both displays, or change the second display to your primary display. No drivers or external power supply is needed. Connect the U444-003-V's reversible USB-C male plug to the USB-C or Thunderbolt™ 3 port on your smartphone, tablet, Ultrabook or computer. Then, connect the adapter's VGA HD15 male plug to the VGA port on your display.

The U444-003-V supports HD video resolutions up to 1920 x 1200 (@ 60 Hz), including 1080p. It also supports data transfer rates up to 5 Gbps and 36-bit Deep Color (12 bits per channel). Compatible with USB-C devices that support USB DisplayPort Alternate Mode.
