

C300P INTUMESCENT PILLOWS

PFC Corofil C300 P Intumescent Pillows have been developed to provide both a temporary and permanent fire barrier to services passing through compartment walls and floors.

- Up to 4 hour fire protection
- Maintenance free
- Clean and simple installation
- Easy to remove and reinstate for new services

C300P INTUMESCENT PILLOWS

Description

PFC Corofil C300 P Intumescent Pillows are manufactured from a durable glass fibre cloth. The pillow contains a mixture of non-hazardous, water resistant exfoliating fillers.

PFC Corofil C300 P Intumescent Pillows are simply packed tightly in between penetrating services and the wall. In a floor, pillows are additionally supported by means of mesh support system. (See Diagram)

Under fire conditions, PFC Corofil C300 P Intumescent Pillows expand several times their original volume to form an effective seal around service penetrations.

PFC Corofil C300 P Intumescent Pillows are suitable for use with:

- Metal pipework
- Cable Trays
- Electrical Trunking (inside and outside)

Estimating Quantities

PFC Corofil C300 P Intumescent Pillows are available in four sizes and the table below outlines approximate quantities of each size to fill one m² area.

Pillow size (mm)	Approximate number per m ² opening
300 x 200 x 30	165
300 x 150 x 30	220
300 x 100 x 30	330
300 x 50 x 30	660

Fire Ratings

PFC Corofil C300 P Intumescent Pillows have been shown to provide four hour fire integrity and two hour insulation rating as tested in accordance with BS476 Part 20.

Specification

Install PFC Corofil C300 P Intumescent Pillows to provide a four hour rating. Installation to be fully in accordance with manufacturers instructions.
