The **RS** safety helmet is Kitemarked and certified to BS 5240 and, together with the available accessories, is suitable for protecting the head from a variety of hazards.

The accessories comprise:

- a. A 230mm deep wrap-around polycarbonate visor (**RS** stock no. 552-034) which must be used in conjunction with the visor holder (**RS** stock no. 552-028).
- b. A pair of accessory mounting posts (**RS** stock no. 552-012) suitable for mounting (a) above.

Fitting the accessories

The accessory mounting posts enable the visor/visor holder to be fitted to the helmet via the pre-formed mounting slots on either side of the helmet.

Note: The slots are initially fitted with blanks which should be removed before the accessory posts may be fitted.

Visor/visor holder

In the case of a visor/visor holder being required then the mounting posts must be fitted to the helmet first. Carefully pull back the protective film from the visor revealing the mounting holes in the top edge. Slot this edge into the curved slot in the visor holder ensuring the locating spigots in the visor holder fit into the mounting slots in the visor. Offer the complete assembly to the mounting posts ensuring the locating prongs are pushed fully home into the slots in the accessory mounting posts on both sides.

When being worn the visor must be pulled down fully into the correct position to ensure maximum protection.

Important

The helmet is manufactured from high quality ABS and must not be cleaned with any form of solvent or abrasive cleaner. Use only a mild solution of soapy water and dry afterwards with a clean soft cloth. Replace helmet and all accessories should any damage, however slight, become evident.
