

A-Box & A-Boxi

As market leaders in waterproof junction boxes we have developed a totally new series of IP65 rated enclosures. ABOX features modern design and innovative techniques, combined with the ease of component assembly. The ABOX has 6 enclosures in it's series and has termination capability from 1 to 35 mm sq conductors and is now available with a flat lid. The high grade material used in this Spelsberg enclosure range guarantees long life. There are a wide range of accessories available with the ABOX series to ensure that this enclosure can be used in many different applications.

The A-Boxi range of junction boxes (Previously known as the Abox Nautic) is manufactured in glass-fibre reinforced polycarbonate, a material which is eminently suitable for use in severe industrial environments and outdoor applications where extreme environmental conditions prevail. The Abox Nautic range is ideal for use in chemical and iron and steel industries, power stations, shipyards, sewage works, docks, electroplating shops, tunnels, in applications underground and many more.
