

## Light motor table LMT

The LMT is a light ergonomic multipurpose workbench that can be equipped for any light industrial or office work. Suitable for assembly work, quality checking, packing tasks and as a designer or supervisor's workbench. The bench complies with ergonomic standards for both sitting and standing positions.

The LMT has a 25 mm melamine worktop with ABS edging and provides motorized height adjustment between 645-1145 mm. The workbench is available in four modular sizes - M1000, M1200, M1500 and M1800. Attaching upright tube modules will give you the opportunity to add a wide range of accessories to the bench. The bench has a load capacity of 150 kg with the uprights supporting 80 kg. Load capacity based on evenly distributed load. Schugo plug.
