# Enclosure components – partitions

Panels/nets mounted with enclosure profile

- Cut XCBL ..×44 and XCEP ..×5/10×44 to desired lengths: Drill holes for fastener yokes XCAF 44 and for assembly of the enclosure profiles (1).

- Mount XCFF 44×130 onto all vertical beams (2).

- Assemble the entire framework (3).

- Mount nets/panels with XCEP ..×5/10×44 onto the framework (4).

- Assemble the door framework and then the nets/panels. Premount the handle onto the XCEP ..×10×44 before assembling it onto the framework (5).

- Mount the hinge to the framework and then the door profile. Please note that it is necessary to mill away 5 mm from XCEP ..×10×44 before mounting the hinges (6).

- Finally, install the ball latch lock kit and security switch kit.
