CarryLite LMS
Location Management System

The CarryLite LMS (Location Management System) is a storage system comprising boxes with accessories, shelving units and trolleys for storage of several boxes. The system is versatile, lightweight and robust containing standard products as well as costumer specific solutions which are made to order.

The CarryLite boxes were launched in 1996 and have proven to be a bestseller and probably the most versatile and robust storage box ever made. Naturally the CarryLite box became the cornerstone of the new Location Management System.

Based on the insight and feedback raaco obtained from one of our long-time users of the CarryLite boxes (Airbus Group) we developed the new version called CarryLite LMS with a set of new features.

The CarryLite LMS is a thought through system for organising workshops, assembly lines, maintenance & repair or similar workplaces, and is a highly usable system for everyone working with LEAN/5S principles.
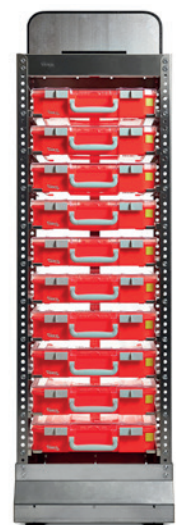

CA-inserts

CarryLite LMS

CarryLite LMS-FOD

CarryLite with foam

CarryLite Depot

CarryLite LMS
Location Management System

Depot for storage/organisation of several CarryLite boxes

+ Organise tools in foam inlay

+ Accessories, parts and consumables in raaco inserts

Major new features
Sandwich lid & Click´n grid

The double lid provides security and overview. It makes it possible to insert a description or layout of content, assembly instructions etc.

The Click´n grid ensures the inserts will remain in place once they are properly fixed in the bottom of the CarryLite box.
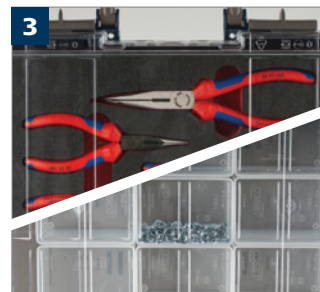

PATENT PENDING

1 Sandwich document lid for description or layout of content, instructions etc.

2 Click'n grid feature to fix the insert in the box

3 Optional lower lid-part. U-profile to ensure smaller parts remain in place or smooth surface for better visibility of content

4 Fastener fixing holes for safety and security

5 Smooth surface for easy labelling/identification

6 RFID holder to hold RFID-Tag for tracking of box

7 Red dots – open/close identification

8 Colour ID-Tags for better identification purposes

CarryLite boxes

The CarryLite LMS boxes come in two different sizes and in two different versions.

The two sizes are called 4x8 and 5x10 and share the same height. The two different versions are standard and FOD.

Both versions are made of high grade polypropylene and polycarbonate.

The CarryLite LMS comes in two sizes and in standard and FOD versions.

Sandwich document lid for description or instruction. U-profiles to ensure smaller parts remain in place.

Sandwich document lid for description or instruction. Smooth surface for better visibility.

raaco + efficiency thru order

CarryLite LMS-FOD

The FOD versions of the CL-LMS range are manufactured in two special colours (RAL 2005 and RAL 2016) and with added fluorescent material for better visibility in dark surroundings.
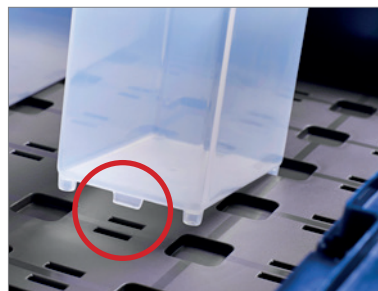

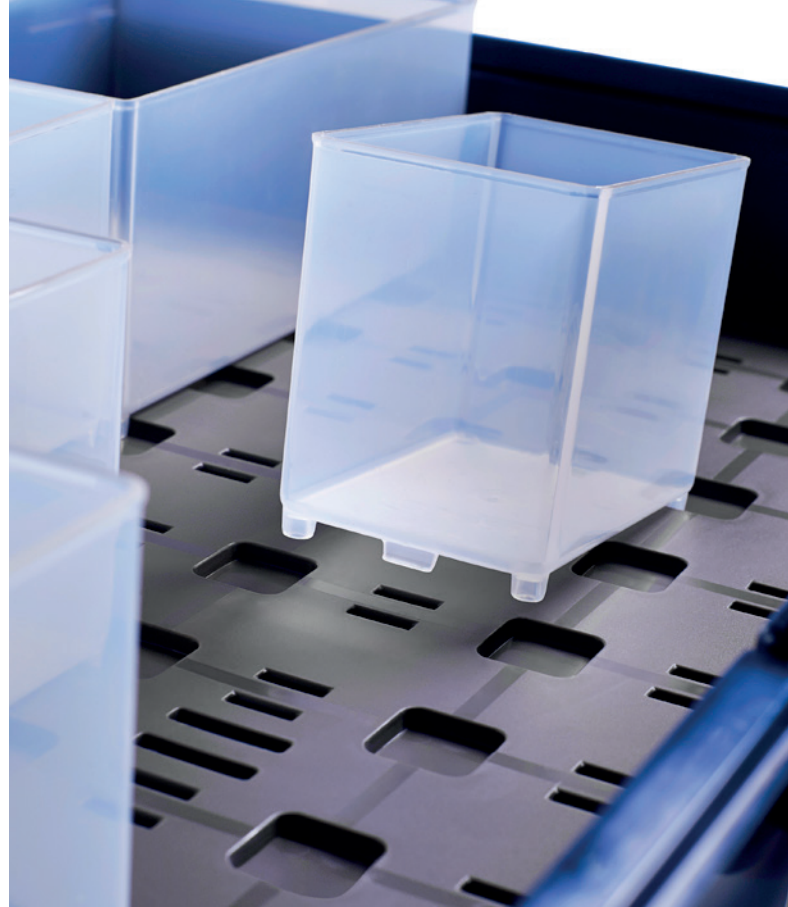

AVOID FOREIGN OBJECTS DAMAGE
raaco
FOD
CARRYLITE LMS FOD

+ Developed together with Airbus Industries

Inserts

The two different sizes of CarryLite LMS boxes can be configured to specific needs by use of 7 different sizes of inserts which ensures the content remains safe in the right location.

There are two different versions of the CA-inserts which look alike. Both are transparent but the FOD-version contains added fluorescent material for better visibility using black light (UV-light).

The range of CA-inserts can be fixed in the click'n grid at the bottom of the CarryLite LMS cases.

Click'n grid feature to fix the insert in the box.

U-profiles ensure smaller parts remain in place.

raaco ✚ efficiency thru order

Foam inlay

Organising tools in a foam inlay inside a CL-LMS box will not only protect the tools but also help in identifying missing tools before leaving the job.

raaco offers the opportunity to create customised foam inlay through an online web-enabled foam configurator.

Find more information on www.raaco.com

+ Have your own foam inlay specially made to fit your own tools.

Trolley and Depot
## Location Management System

Lightweight, robust, versatile and with excellent overview.

The CarryLite LMS System includes trolleys and depots for storage and organisation of several CarryLite boxes in one place.

raaco has 5 versions of trolleys and depots for different kinds of need for storage and organisation. raaco also offers the option of custom made trolleys and depots.

All trolleys and depots are made of lightweight aluminum.

raaco ✚ efficiency thru order

Bearings with stops keep CarryLites in place during transportation

Magnet-lock holds the shelf in place when in collapsed position

Label holder for ID purposes

Two collapsible shelves to support 2 CarryLites in use
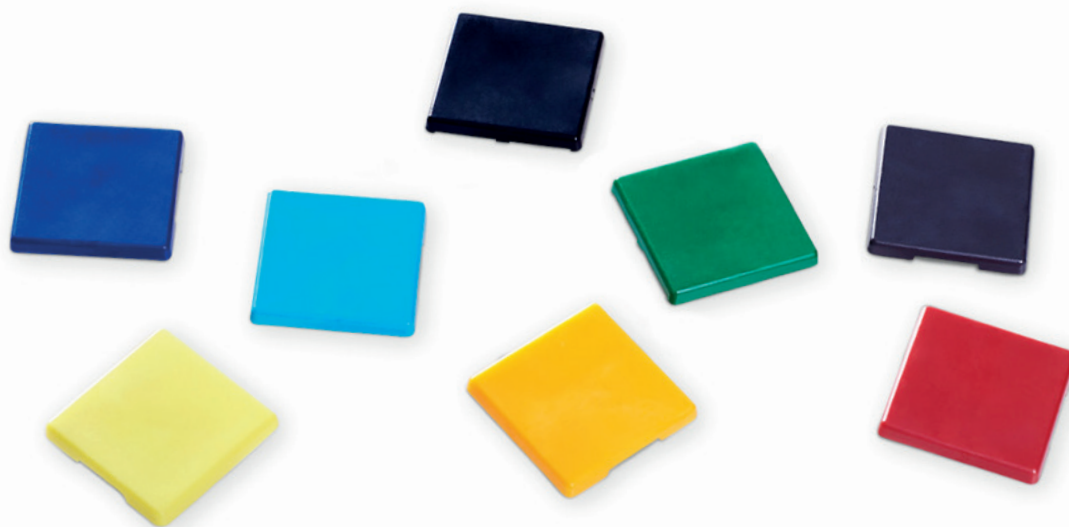

Two handles for easy manoeuvering

Four wheels with brakes ensure trolley remains in position, and strong bumpers (optional) to protect the surroundings

raaco ✚ efficiency thru order

Accessories and spare parts

Replaceable ID-tags in 8 different colours can be used for colour coding and labelling to ensure quick identification of the right CarryLite LMS box and content.

RFID holders for the two sizes of CL-LMS boxes can securely hold RFID labels/tags free of dust etc. The RFID holders are available in a standard as well as in a FOD version.

The CarryLite LMS system is designed for disassembly which makes it possible to replace a broken part in the rare case it is needed.
