Hexiwear Docking Station

PID: MIKROE-2094

RS Product Code: 122-2284

EXPANSION BOARD WITH ONBOARD PROGRAMMER

The Hexiwear Docking Station is for developers who want complete control over Hexiwear's hardware. Expand Hexiwear with up to three click boards and turn it into something completely different. Upload new firmware through the USB port using the on board OpenSDA programmer; or connect an external programmer to the Cortex Debug connector. Expand Hexiwear's memory with an SD Card. Add audio capabilities using the I2S pinout. See full Documentation.

Package contains:

- Hexiwear Docking Station
- USB cable

Specification

On-board modules	JTAG connector, OpenSDA control interface, Micro USB port, LED
Interface	I2S
Storage	microSD slot
Power Supply	5V (via USB)
Weight	200g
