

gesis[®]

Application example

General

Electronic components become increasingly smaller. Consumer devices become smaller and the electrical connection must therefore become smaller, too. For installations in exhibition systems, on the shelf or in façades every inch counts. 'The smaller, the better' is the motto here. With its extremely compact dimensions, **gesis** MINI proves itself to fit perfectly while providing full performance. Its implementation guarantees 250 V and 16 A. **gesis** MINI provides all the benefits of the classical **gesis** system and integrates itself perfectly.

Technical data

General information:

Number of poles:	2, 3, 5 pole
Rated voltage:	250 V; 250/400 V (5 pole)
Rated current:	16 A
Locking device:	Integrated
Regulations:	DIN VDE 0606; DIN VDE 0627 (5 pole)
Approvals:	DIN VDE 0606; DIN VDE 0627 (5 pole)
Type of protection:	IP 20, DIN VDE 0470 IP 40 when plugged in
Mating/disconnect cycles:	approx. 50 – 100 insertions/withdrawals at an ohmic load of 16 A
Rated impulse voltage:	4 kV / 250 V
Material:	
Insulating part:	Thermoplastic, halogen-free
Contact parts:	Plated brass
Screws:	Zinc-plated steel
Continuous temperature:	
Insulation components:	100° C
Cables :	70° C
Ambient conditions:	Pollution degree 2 according to DIN VDE 0110 Part 1 Definition: Only non-conductive pollution occurs. Occasional transient conductivity due to moisture condensation must be taken into account. Example: Private homes, retail sites and other commercial buildings
Coding:	Mechanical coding symbolized by color code white and black with the same mechanical coding All components available for delivery in these colors. Please note possibly differing voltage and current load
General:	On the female part, protection against inadvertent contact is guaranteed even when disconnected. Ground conductor is leading. The live component must be a female connector according to regulations. It is not possible to install cable in a ring circuit.
Note :	Compliance with VDE 0606 will not automatically prevent a dangerous non-polarization with other installation connector systems. Installation system GST 15i3 is not a substitute for the national connector and outlet system for home applications. A dangerous non-polarization is impossible with systems that are defined in the standards of IEC 60309, IEC 60320 and IEC 60906 or with the national connector and outlet systems for home applications.

Technical data

Connector:

Variations:	Female and male connectors with strain relief
Type of connection:	Screw, M 3
Torque:	max. 0.5 Nm
Wire range:	0.75 – 1.5 mm ²
Sheath strip length:	as specified! Consider the ground conductor!
Insulation strip length:	8 ₋₁ mm
Strain relief:	Cable type: H05VV-F, NYM; others available on request
Flammability load:	0.01 kWh

Snap-in, appliance coupler:

Variations:	Female and male connectors with frames for snap-in in housing cut-out
Type of connection:	Screw, M 3
Tightening torque:	0.3 – 0.5 Nm (for 0.5 mm ² = max. 0.3 Nm)
Wire range:	0.5 - 1.5mm ²
Insulation strip length:	8 ₋₁ mm
Housing material thickness:	Frame for snap-in into 0.5 – 1.5 mm thick walls
Flammability load:	0.01 kWh

Cable, pre-assembled:

Variations:	Connection cable, Female – Male Connection cable, Female – Free End Connection cable, Male – Free end	
Type of connection:	Screw, M 3	
Free wire ends:	Sheath strip length	as specified
	Insulation strip length	8 mm, ultrasonically compressed
Cable:	With halogen (PVC)	H05VV-F xG1.5 x = 2, 3, 5
	Halogen-free	S05Z1Z1-F xG1.5
Cable length:	0.2 – 10 m; other lengths available on request
