

PRESSURE SENSING

PAC50 PNEUMATIC PRESSURE SENSORS

Key customer benefits

- Reduces errors thanks to clear status indication on the display
- Saves time due to quick commission thanks to finger operated push buttons and intuitive display
- Can be used in all environments due to IP67 protection
- Industry 4.0 ready due to IO Link interface

At a glance

- Pressure measurement of compressed air
- Real-time pressure, switch points and switch status available at a glance via colour changing display
- Selection of pressure ranges to cover pressures from -1 to +10 Bar.
- 4-20mA / 0-10V, 2 x switched + IO Link
- Finger operated push buttons for ease of operation
- Robust M12, IP67 connectivity

Key industries & applications

- Packaging - ensure seal pressure is correct
- Automotive - ensure press fits are correctly made
- Drives and Controls - for efficient utilisation of Pneumatic control systems

Industry solutions

- Motion Control, Plant maintenance, Industry 4.0
