

Data Sheet

HMC557A

FEATURES

- Conversion loss: 8 dB
- LO to RF isolation: 50 dB
- LO to IF isolation: 35 dB
- Input third-order intercept (IP3): 18 dBm
- Input second-order intercept (IP2): 55 dBm
- LO port return loss: 8 dBm
- RF port return loss: 10 dBm
- Passive double balanced topology
- Wide IF bandwidth: dc to 3 GHz
- 24-terminal ceramic leadless chip carrier package

APPLICATIONS

- WiMAX and fixed wireless
- Point to point radios
- Point to multipoint radios
- Test equipment and sensors
- Military end use

Figure 1.

GENERAL DESCRIPTION

The **HMC557A** is a general-purpose, double balanced mixer in a 24-terminal, ceramic leadless chip carrier, RoHS-compliant package. The device can be used as an upconverter or down-converter from 2.5 GHz to 7.0 GHz. This mixer is fabricated in a gallium arsenide (GaAs) metal semiconductor field effect transistor (MESFET) process and requires no external components or matching circuitry.

The **HMC557A** provides excellent local oscillator (LO) to radio frequency (RF) and LO to intermediate frequency (IF) isolation due to optimized balun structures. The RoHS-compliant **HMC557A** eliminates the need for wire bonding and is compatible with high volume surface-mount manufacturing techniques.

ELECTRICAL SPECIFICATIONS

2.5 GHz TO 5.0 GHz FREQUENCY RANGE

$T_A = 25^\circ\text{C}$, IF = 100 MHz, LO drive = 15 dBm. All measurements performed as a downconverter with the upper sideband selected, unless otherwise noted.

Table 1.

Parameter	Min	Typ	Max	Unit
OPERATING CONDITIONS				
RF Frequency Range	2.5		5.0	GHz
LO Frequency Range	2.5		5.0	GHz
IF Frequency Range	DC		3	GHz
PERFORMANCE				
Conversion Loss		8	10.5	dB
Noise Figure, Single Sideband (SSB)		8		dB
LO to RF Isolation	40	50		dB
LO to IF Isolation	26	35		dB
RF to IF Isolation		20		dB
Input Third-Order Intercept (IP3)	14	18		dBm
Input Second-Order Intercept (IP2)		55		dBm
Input Power for 1 dB Compression (P1dB)		10		dBm
RF Port Return Loss		10		dB
LO Port Return Loss		8		dB

5.0 GHz TO 7.0 GHz FREQUENCY RANGE

$T_A = 25^\circ\text{C}$, IF = 100 MHz, LO drive = 15 dBm. All measurements performed as a downconverter with the upper sideband selected, unless otherwise noted.

Table 2.

Parameter	Min	Typ	Max	Unit
OPERATING CONDITIONS				
RF Frequency Range	5.0		7.0	GHz
LO Frequency Range	5.0		7.0	GHz
IF Frequency Range	DC		3	GHz
PERFORMANCE				
Conversion Loss		8.5	10.5	dB
Noise Figure, Single Sideband (SSB)		8.5		dB
LO to RF Isolation	37	43		dB
LO to IF Isolation	25	33		dB
RF to IF Isolation		25		dB
Input Third-Order Intercept (IP3)	14	18		dBm
Input Second-Order Intercept (IP2)		55		dBm
Input Power for 1 dB Compression (P1dB)		10		dBm
RF Port Return Loss		12		dB
LO Port Return Loss		12		dB

ABSOLUTE MAXIMUM RATINGS

Table 3.

Parameter	Rating
RF Input Power	25 dBm
LO Input Power	27 dBm
Channel Temperature	175°C
Continuous P_{DISS} ($T = 85^\circ\text{C}$), Derate 10.81 mW/ $^\circ\text{C}$ Above 85°C)	972 mW
Thermal Resistance (Channel to Ground Pad)	92.5°C/W
Maximum Peak Reflow Temperature	260°C
Storage Temperature Range	-65°C to +150°C
Operating Temperature Range	-40°C to +85°C
ESD Sensitivity, Human Body Model (HBM)	1000 V (Class 1C)

Stresses at or above those listed under Absolute Maximum Ratings may cause permanent damage to the product. This is a stress rating only; functional operation of the product at these or any other conditions above those indicated in the operational section of this specification is not implied. Operation beyond the maximum operating conditions for extended periods may affect product reliability.

ESD CAUTION

ESD (electrostatic discharge) sensitive device.
Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

PIN CONFIGURATION AND FUNCTION DESCRIPTIONS

NOTES

1. NIC = NO INTERNAL CONNECTION.
2. CONNECT THE EXPOSED PAD TO A LOW IMPEDANCE THERMAL AND ELECTRICAL GROUND PLANE.

13161-102

Figure 2. Pin Configuration

Table 4. Pin Function Descriptions

Pin No.	Mnemonic	Description
1, 5 to 7, 11 to 14, 18 to 24	NIC	No Internal Connection. No connection is required on these pins. These pins are not internally connected. However, all data is measured with these pins connected to RF/dc ground externally.
2, 4, 8, 10, 15, 17	GND	Ground Connect. Connect these pins and the package bottom to RF/dc ground.
3	LO	Local Oscillator Port. This pin is dc-coupled and matched to 50 Ω.
9	IF	Intermediate Frequency Port. This pin is dc-coupled. For applications not requiring operation to dc, block this pin externally using a series capacitor with a value chosen to pass the necessary IF frequency range. For operation to dc, this pin must not source or sink more than 2 mA of current or device nonfunctionality or device failure may result.
16	RF	Radio Frequency Port. This pin is dc-coupled and matched to 50 Ω.
	EPAD	Exposed Pad. Connect the exposed pad to a low impedance thermal and electrical ground plane.

SPURIOUS PERFORMANCE WITH UPPER SIDEBAND SELECTED, IF = 100 MHz

Mixer spurious products are measured in dBc from the IF output power level. Spur values are $(M \times RF) - (N \times LO)$.

M × N Spurious Outputs

RF frequency = 5 GHz, RF input power = -10 dBm, LO frequency = 4.9 GHz, LO drive = 15 dBm.

EV1HMC557ALC4¹

Item	Description
J1, J2, J3	Johnson SMA connector
U1	HMC557ALC4 mixer
PCB ²	118703 evaluation PCB ³

¹ Reference this number when ordering the complete evaluation PCB.² The circuit board material is Rogers 4350.³ This is the bare PCB of the evaluation PCB kit (see Figure 83).

It is recommended that the application circuit board use RF circuit design techniques. Use signal lines with a $50\ \Omega$ impedance, and connect the package ground leads and exposed pad directly to the ground plane. Use a sufficient number of via holes to connect the top and bottom ground planes. The evaluation circuit board shown in Figure 83 is available from Analog Devices, Inc., upon request.
