Conforming to EMC Directive

Recognition

Certified (NPN output types of connector type only)

* Passed the UL 991 Environment Test

* UL 61010C-1 compatible, Passed the UL 991 Environment Test based on SEMI S2-0200. [Category applicable for semiconductor manufacturing: TWW2, Process Equipment] [Applicable standards: UL 61010C-1] [Additional test / evaluation standards as per intended use: UL 991, SEMI S2-0200]

PNP output type available
Timer
Interference prevention
Light intensity monitor
Automatic sensitivity setting

Constant advances achieving significant improvement of sensing performance

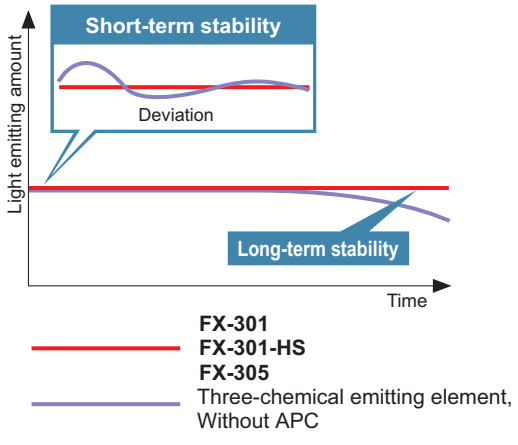
The digital fiber sensor **FX-301(P)** has been modified since its production in June 2004.

Stable sensing over long and short periods

FX-301 FX-301-HS FX-305

In addition to a "four-chemical emitting element" which suppresses changes in the light emitting element over time so that a stable level of light emission can be maintained over long periods, a "APC (Auto Power Control) circuit" has also been adopted afreshly. The light emitting amount can be controlled in minute degrees so that even changes occurring over very short periods can be handled, allowing stable sensing performance by suppressing deviations in light emitting amounts caused by changes in the ambient environment that could not previously be suppressed.

• Stable sensing comparison

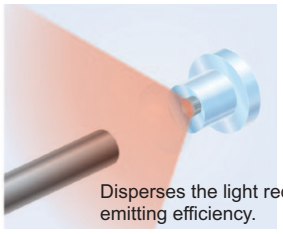


Even greater sensing range

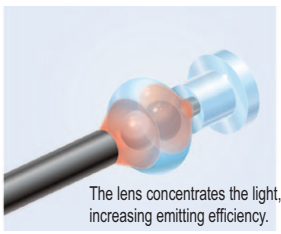
All models

Adoption of a "double coupling lens" that increases emission efficiency to its maximum limits and greatly increases sensing range. Sensing ranges with small diameter fibers and ultra-small diameter fibers, which have become very popular due to the miniaturization of chip components, have been increased by 50 % over previous values achieved with other amplifiers.

• Conventional fiber sensors (Without lens)

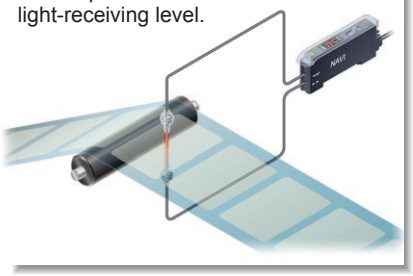


• Double coupling lens

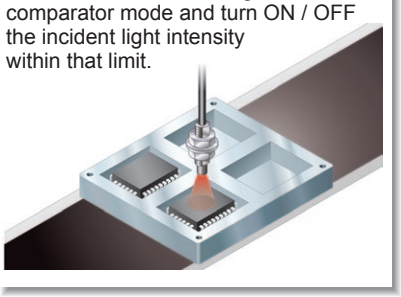


APPLICATIONS

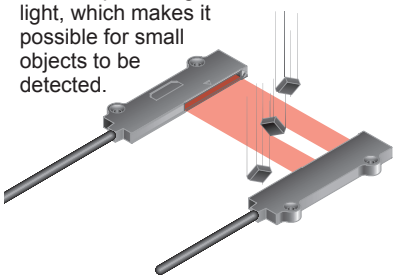
Detecting the presence or absence of labels
The light-emitting amount selection function can even stabilize detection of transparent labels that saturate the light-receiving level.



Detecting the presence or absence of ICs on a tray
You can set upper and lower limits for the threshold values using the window comparator mode and turn ON / OFF the incident light intensity within that limit.



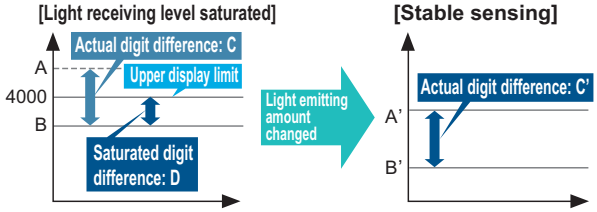
Detecting the passage of small objects
The differential sensing mode will only detect rapid changes in the amount of light, which makes it possible for small objects to be detected.



Light-emitting amount selection

FX-301 FX-301-HS FX-305

If the light receiving level becomes saturated during close-range sensing or when sensing transparent or minute objects, you can adjust the light emitting amount of the sensor to stabilize sensing without needing to change the response time. Sensing that previously required the response time or fibers to be changed can now be set much more easily using this function.



Light emitting amount can be changed without changing response time

Large display 9999

FX-305

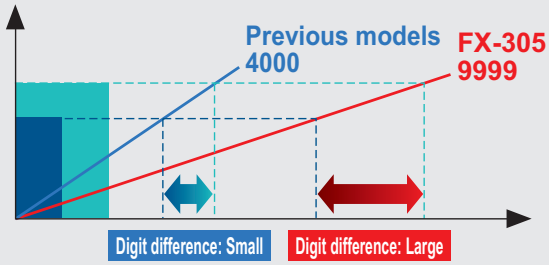
Large display with 4 digits (9999). With a greater difference in digit value than previous models, threshold values can be set in units of 1 digit up to maximum 9999. Threshold setting can now be done more easily and accurately.

(During STDF, LONG and U-LG modes)

2.5 times previous models

- **Digit difference comparison**

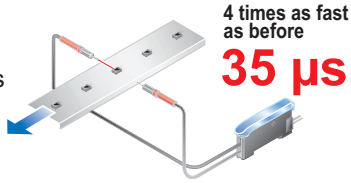
Example Digit difference between **object A** and **object B**

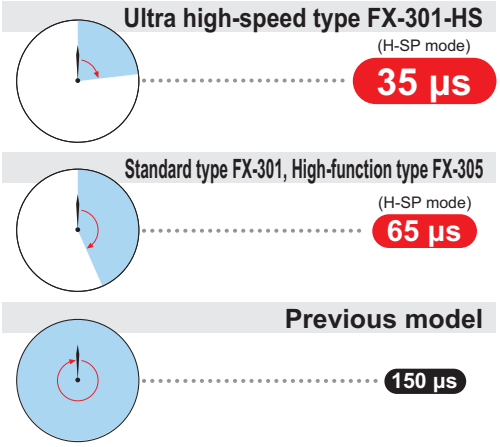


Ultra high-speed 35 µs response

FX-301-HS

Ultra high-speed 35 µs response. Even small objects moving at high speeds can be sensed. In addition, at 65 µs the **FX-301** standard type and **FX-305** high-function type is also twice as fast as previous models.





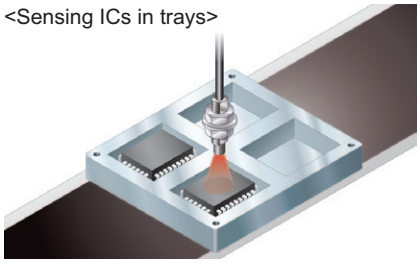
Simplified systems using new operating modes

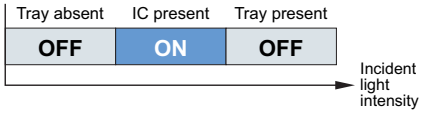
FX-305

A window comparator mode and differential sensing mode have been added. These modes make it easy to carry out sensing tasks that previously required multiple sensors or involved complex threshold settings.

• Window comparator mode

<Sensing ICs in trays>

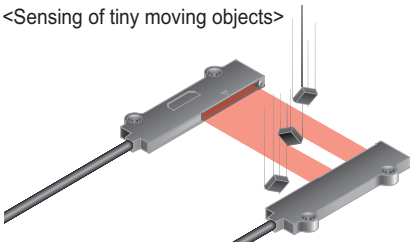


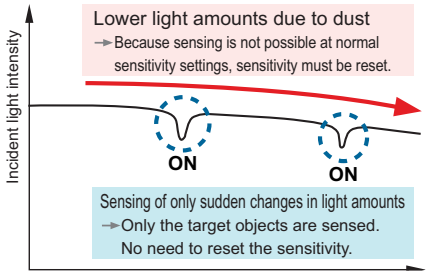


Upper and lower limits for threshold values can be set so that the incident light intensity can turn on and off within those ranges. Single output is used, so that only one cable is required, and no PLC processing is required either.

• Differential sensing mode

<Sensing of tiny moving objects>



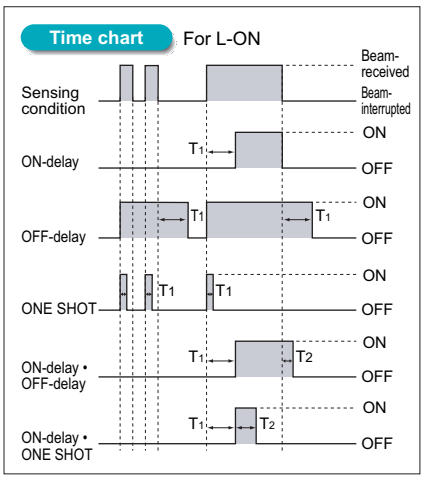


Equipped with 5 types timers

FX-305

The **FX-305** includes the same ON-delay / OFF-delay / ONE SHOT timer as the **FX-301**(**-HS**), as well as an ON-delay • OFF-delay timer and an ON-delay • ONE SHOT timer. A wide variety of timer control operations can be carried out by these fiber sensors alone.

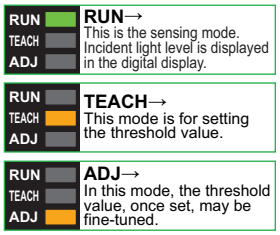
Timer period
Output 1: 0.5 to 9,999 ms (variable)
Output 2: 0.5 to 500 ms (variable)

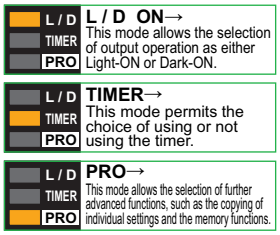


Even beginners can quickly learn how to use the MODE NAVI

All models

MODE NAVI uses six indicators to display the amplifier's basic operations. The current operating mode can be confirmed at a glance, so even a first time user can easily operate the amplifier without becoming confused.

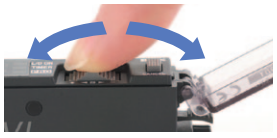




Easy confirming of threshold value settings

FX-301 FX-301-HS FX-305

The threshold value can be confirmed by turning the jog switch even during RUN mode.



Jog switch is turned

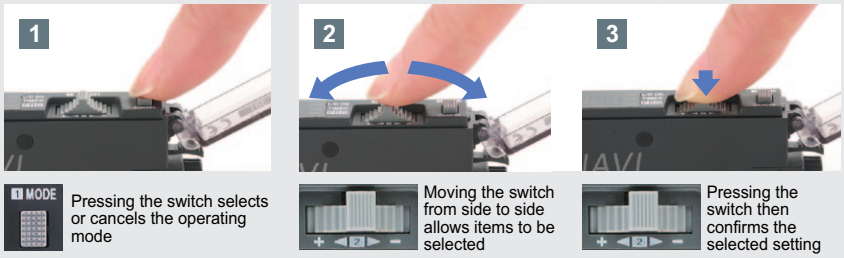
Left: **FX-301**(**-HS**) Output 1 for **FX-305**
Right: Output 2 for **FX-305**

The threshold value is displayed

The use of only two switches makes for very simple operations — All models

Only two switches, the large jog switch and the large MODE key, are required for operation. You can operate it simply by the 3 steps shown on the right.

- **Large MODE key**
- **Large jog switch**

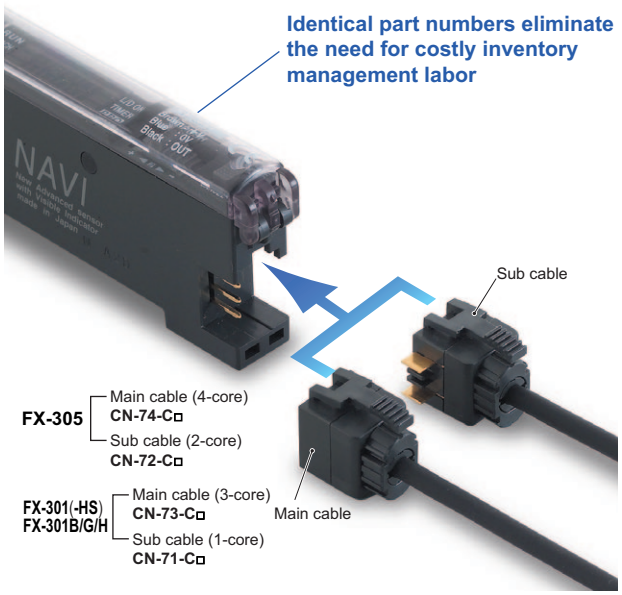


1. Pressing the switch selects or cancels the operating mode
2. Moving the switch from side to side allows items to be selected
3. Pressing the switch then confirms the selected setting

A quick-connection cable saves wiring and work-hours — Connector type

One unit can be used as either a main unit or sub unit

The amplifier unit can be used as either a main unit or a sub unit. This feature allows for easy mounting in the side-by-side configuration. The main and sub unit functions are distinguished only by the proper use of the main cable and the sub cable.
Moreover, inventory management and maintenance is simplified.



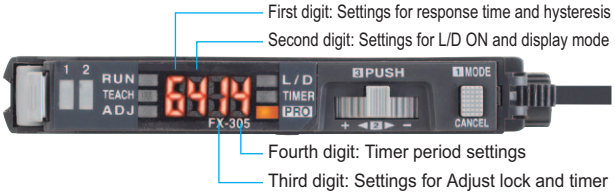
An optical communication function allows up to *16 sensors to be adjusted simultaneously — FX-301 FX-305

The optical communication function allows the data that is currently set to be copied and saved all at once for all amplifiers connected together from the right side. This greatly reduces troublesome setup tasks and makes setup much smoother.In addition, troublesome adjustment operations at times such as when replacing sensors can also be carried out easily and data can also be copied and stored using the optical communication function.

* Use the optical communication function for only the same types of sensors. Furthermore, the **FX-301-HS** is not equipped with optical communication function capability.

Settings can be entered directly using numerical input — All models

Every function can be directly set merely by the input of a four digit code (numbers) from the code table. This convenient feature is easy to set up. In the event that settings are accidentally changed at the operating site, merely entering the correct code can restore the original settings. This results in easy and quick maintenance.



Communication unit improves equipment starting up and maintenance — FX-301 FX-305

External input unit for digital sensor — FX-CH2

Teaching and changing settings can be performed by using the PLC and touch panel.

Various settings and switching of up to 16 units of digital fiber sensors can be accomplished at once without operating the actual sensors themselves, but via external signals, such as the PLC, touch panel, and push buttons.

<Main functions>

- Batch teaching
- Key lock setting
- Batch loading / saving of the data bank

Refer to our website for details

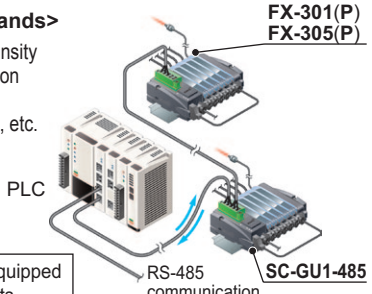
Upper communication unit for digital sensor — SC-GU1-485

We now offer remote maintenance for digital sensors!

The communication unit enables inputs to the digital fiber sensors (such as teaching and data bank switching) to be carried out via a PLC or a personal computer, and also allows confirming of the incident light intensity an output status for the fiber sensors. This greatly improves workability during equipment starting up and maintenance.

<Communicable commands>

- Sensor incident light intensity
- Sensor settings verification
- Sensor output status
- Threshold value settings, etc.



Compatible with all PLCs equipped with RS-485 compatible units

Refer to **SC-GU1-485** pages for details

ORDER GUIDE

Amplifiers

Quick-connection cable is not supplied with the amplifier. Please order it separately.

Type	Appearance	Model No.	Emitting element	Output	Quick-connection cables		
					Type	Model No.	Length

ORDER GUIDE

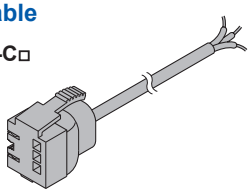
Quick-connection cables

For FX-301(-HS)/B/G/H Quick-connection cable is not supplied with the amplifier. Please order it separately.

Type	Model No.	Description	
Main cable (3-core)	**CN-73-C1**	Length: 1 m 3.281 ft	0.15 mm² 3-core cabtyre cable, with connector on one end Cable outer diameter: ø3.0 mm ø0.118 in
	CN-73-C2	Length: 2 m 6.562 ft	
	CN-73-C5	Length: 5 m 16.404 ft	
Sub cable (1-core)	**CN-71-C1**	Length: 1 m 3.281 ft	0.15 mm² 1-core cabtyre cable, with connector on one end Cable outer diameter: ø3.0 mm ø0.118 in
	CN-71-C2	Length: 2 m 6.562 ft	
	CN-71-C5	Length: 5 m 16.404 ft	

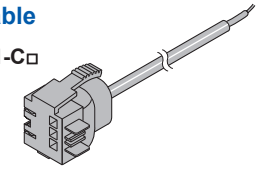
Main cable

• **CN-73-C□**



Sub cable

• **CN-71-C□**

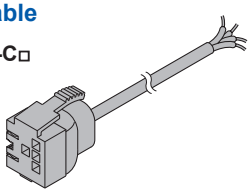


For FX-305 Quick-connection cable is not supplied with the amplifier. Please order it separately.

Type	Model No.	Description	
Main cable (4-core)	**CN-74-C1**	Length: 1 m 3.281 ft	0.15 mm² 4-core cabtyre cable, with connector on one end Cable outer diameter: ø3.0 mm ø0.118 in
	CN-74-C2	Length: 2 m 6.562 ft	
	CN-74-C5	Length: 5 m 16.404 ft	
Sub cable (2-core)	**CN-72-C1**	Length: 1 m 3.281 ft	0.15 mm² 2-core cabtyre cable, with connector on one end Cable outer diameter: ø3.0 mm ø0.118 in
	CN-72-C2	Length: 2 m 6.562 ft	
	CN-72-C5	Length: 5 m 16.404 ft	

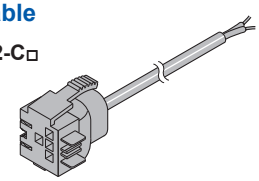
Main cable

• **CN-74-C□**



Sub cable

• **CN-72-C□**



End plates

End plates are not supplied with the amplifier. Please order them separately when the amplifiers are mounted in cascade.

Appearance	Model No.	Description
	**MS-DIN-E**	When cascading multiple amplifiers, or when it moves depending on the way it is installed on a DIN rail, these end plates clamp amplifiers into place on both sides. Make sure to use end plates when cascading multiple amplifiers together. Two pcs. per set

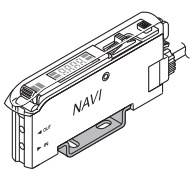
OPTIONS

Designation	Model No.	Description
Amplifier mounting bracket	**MS-DIN-2**	Mounting bracket for amplifier
Fiber amplifier protection seal	**FX-MB1**	10 sets of 2 communication window seals and 1 connector seal Communication window seal: It prevents malfunction due to transmission signal from another amplifier, as well as, prevents effect on another amplifier. Connector seal: It prevents contact of any metal, etc., with the pins of the quick-connection cable.

Note: Fiber amplifier protection seals are supplied with the **FX-301**(**P**) and **FX-305**(**P**).

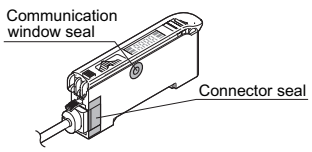
Amplifier mounting bracket

• **MS-DIN-2**



Fiber amplifier protection seal

• **FX-MB1**



LIST OF FIBERS

FX-301 / FX-305 (Red LED type) sensing range (Note 1)

Thru-beam type (one pair set)

The **FX-305** and **FX-301**(**-HS**) have different sensing modes.
FX-305: H-SP, FAST, STD, STDF, LONG, U-LG (no S-D mode)
FX-301(**-HS**): S-D, H-SP (Note 1), FAST, STD, LONG (no STDF or U-LG mode)

Fibers are listed in alphabetic order. Refer to p.5~ “Fiber Selection” for details of each fiber.

Notes: 1) Refer to p.35~ for the sensing ranges for the **FX-301-HS** in H-SP mode.
2) Note that the sensing range of the free-cut type fiber may be reduced by 20 % max. depending upon how the fiber is cut.
3) The fiber cable length practically limits the sensing range to 3,500 mm 137.795 in long.
4) The fiber cable length practically limits the sensing range to 19,500 mm 767.717 in long.
5) Heat-resistant joint fibers and ordinary-temperature fibers (**FT-FM2**) are sold as a set.
6) Sold as a set comprising vacuum type fiber + photo-terminal (**FV-BR1**) + fiber at atmospheric side (**FT-J8**).

LIST OF FIBERS

FX-301 / FX-305 (Red LED type) sensing range (Note 1)

Thru-beam type (one pair set)

The **FX-305** and **FX-301**(**-HS**) have different sensing modes.
FX-305: H-SP, FAST, STD, STDF, LONG, U-LG (no S-D mode)
FX-301(**-HS**): S-D, H-SP (Note 1), FAST, STD, LONG (no STDF or U-LG mode)

Fibers are listed in alphabetic order. Refer to p.5~ "Fiber Selection" for details of each fiber.

Model No.	Sensing range (mm in) (Note 2)							Dimensions

Notes: 1) Refer to p.35~ for the sensing ranges for the **FX-301-HS** in H-SP mode.
2) Note that the sensing range of the free-cut type fiber may be reduced by 20 % max. depending upon how the fiber is cut.
3) The fiber cable length practically limits the sensing range to 3,500 mm 137.795 in long.

LIST OF FIBERS

FX-301 / FX-305 (Red LED type) sensing range (Note 1)

Retroreflective type

The **FX-305** and **FX-301**(**-HS**) have different sensing modes.
FX-305: H-SP, FAST, STD, STDF, LONG, U-LG (no S-D mode)
FX-301(**-HS**): S-D, H-SP (Note 1), FAST, STD, LONG (no STDF or U-LG mode)

Fibers are listed in alphabetic order. Refer to p.5~ “Fiber Selection” for details of each fiber.

Model No.	Sensing range (mm in) (Note 2, 3)							Dimensions
	Red LED							
	U-LG	LONG	STDF	STD	FAST	H-SP	S-D	
FR-KV1	15 to 370 0.591 to 14.567	15 to 330 0.591 to 12.992	15 to 240 0.591 to 9.449	15 to 210 0.591 to 8.268	15 to 170 0.591 to 6.693	15 to 80 0.591 to 3.150	15 to 90 0.591 to 3.543	P.98

FR-WKZ11	100 to 910 3.937 to 35.827	100 to 730 3.937 to 28.740	100 to 600 3.937 to 23.622	100 to 520 3.937 to 20.472	100 to 460 3.937 to 18.110	———	———	P.98

Notes: 1) Refer to p.35~ for the sensing ranges for the **FX-301-HS** in H-SP mode.
2) Note that the sensing range of the free-cut type fiber may be reduced by 20 % max. depending upon how the fiber is cut.
The sensing range of **FR-WKZ11** is specified for the **RF-13**. The sensing range of **FR-KZ21** and **FR-KZ21E** is specified for the attached reflector **RF-003**.
The sensing range of **FR-KV1** is specified for the attached reflector.
3) The sensing range of retroreflective type is the possible setting range for the attached reflector. The fiber can detect an object less than setting range for the reflector. However, note that if there are any white or highly-reflective surfaces near the fiber head, reflected incident light may affect the fiber head. If this occurs, adjust the threshold value of the amplifier unit before use.

FX-301 / FX-305 (Red LED type) sensing range (Note 1)

Reflective type

The **FX-305** and **FX-301**(**-HS**) have different sensing modes.
FX-305: H-SP, FAST, STD, STDF, LONG, U-LG (no S-D mode)
FX-301(**-HS**): S-D, H-SP (Note 1), FAST, STD, LONG (no STDF or U-LG mode)

Fibers are listed in alphabetic order. Refer to p.5~ “Fiber Selection” for details of each fiber.

Notes: 1) Refer to p.35~ for the sensing ranges for the **FX-301-HS** in H-SP mode.
2) The standard sensing objects of the sensing ranges vary depending on the fibers.
3) Note that the sensing range of the free-cut type fiber may be reduced by 20 % max. depending upon how the fiber is cut.
4) Sold as a set comprising vacuum type fiber + photo-terminal (**FV-BR1**) + fiber at atmospheric side (**FT-J8**).
5) Sensing distance varies depending on the sensing object's inclination.

SENSING RANGE OF BLUE LED / GREEN LED / INFRARED LED

Thru-beam type (One pair set)

Fibers are listed in alphabetic order. Refer to p.5~ for details of each fiber.

Model No.	Sensing range (mm in) (Note 1)									Dimensions

Notes: 1) Note that the sensing range of the free-cut type fiber may be reduced by 20 % max. depending upon how the fiber is cut.
2) Because infrared types are easily affected by humidity, please ask assistance when using them in a humid environment or in an environment with varying humidity.
3) Sensing range when fiber length is 2 m 6.562 ft. When fiber length is 10 m 32.81 ft, the beam attenuates and cannot be used.
4) Heat-resistant joint fibers and ordinary-temperature fibers (**FT-FM2**) are sold as a set.
5) Sold as a set comprising vacuum type fiber + photo-terminal (**FV-BR1**) + fiber at atmospheric side (**FT-J8**).

SENSING RANGE OF BLUE LED / GREEN LED / INFRARED LED

Thru-beam type (One pair set)

Fibers are listed in alphabetic order. Refer to p.5~ “Fiber Selection” for details of each fiber.

FR-WKZ11	———	———	———	———	———	———	100 to 340 3.937 to 13.386	———	———	P.98

Notes: 1) Note that the sensing range of the free-cut type fiber may be reduced by 20 % max. depending upon how the fiber is cut.
2) The sensing range of retroreflective type is the possible setting range for the attached reflector. The fiber can detect an object less than setting range for the reflector. However, note that if there are any white or highly-reflective surfaces near the fiber head, reflected incident light may affect the fiber head. If this occurs, adjust the threshold value of the amplifier unit before use.

Reflective type

Fibers are listed in alphabetic order. Refer to p.5~ “Fiber Selection” for details of each fiber.

Notes: 1) The standard sensing objects of the sensing ranges vary depending on the fibers.
2) Note that the sensing range of the free-cut type fiber may be reduced by 20 % max. depending upon how the fiber is cut.
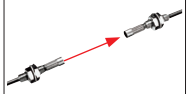
3) Sold as a set comprising vacuum type fiber + photo-terminal (**FV-BR1**) + fiber at atmospheric side (**FT-J8**).

FIBER OPTIONS

Lens (for thru-beam type fiber)

For thru-beam type fiber

Expansion lens (Note 1) — FX-LE1



Increases the sensing range by 5 times or more.

- Ambient temperature: –60 to +350 °C –76 to +662 °F (Note 5)

Sensing range for red LED type (mm) [Lens on both sides] (Note 3)

Fiber \ Mode	U-LG	LONG	STDF	STD	FAST	S-D	H-SP

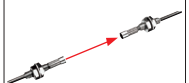
Expansion lens for vacuum fiber (Note 1) — FV-LE1



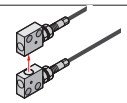
Sensing range increases by 4 times or more.

- Ambient temperature: –60 to +350 °C –76 to +662 °F (Note 5)

Sensing range for red LED type (mm) [Lens on both sides] (Note 3, 4)

Fiber \ Mode	U-LG	LONG	STDF	STD	FAST	S-D	H-SP
FT-H30-M1V-S	1,600	1,200	650	450	300	150	200

Vacuum resistant side-view lens (Note 1) — FV-SV2



Beam axis is bent by 90°.

- Ambient temperature: –60 to +300 °C –76 to +572 °F (Note 5)

Sensing range for red LED type (mm) [Lens on both sides] (Note 3, 4)

Fiber \ Mode	U-LG	LONG	STDF	STD	FAST	S-D	H-SP
FT-H30-M1V-S	1,600	1,200	650	450	300	150	200

Notes: 1) Be careful when installing the thru-beam type fiber equipped with the expansion lens, as the beam envelope becomes narrow and alignment is difficult. Especially when installing a fiber with many cores (sharp bending fibers and heat-resistant glass fiber), please be sure to use it only after you have adjusted it sufficiently.
2) The fiber cable length practically limits the sensing range to 3,500 mm 137.795 in long (**FT-P81X**, **FT-H20W-M1** and **FT-H20-M1**: 1,600 mm 62.992 in).
3) The sensing ranges are the values for red LED type amplifier. Please contact our office for details on sensing ranges for other types of amplifiers.
4) The fiber cable length for the **FT-H30-M1V-S** is 1 m 3.281 ft. The sensing ranges in U-LG and LONG modes take into account the length of the **FT-J8** atmospheric side fiber.
5) Refer to p.76~ for the ambient temperatures of fibers to be used in combination.

FIBER OPTIONS

Lens (for reflective type fiber)

Designation		Model No.		Description
For reflective type fiber	Pinpoint spot lens	**FX-MR1**		Pinpoint spot of ø0.5 mm ø0.020 in. Enables detection of minute objects or small marks. • Distance to focal point: 6 ±1 mm 0.236 ±0.039 in • Applicable fibers: **FD-WG4**, **FD-G4** • Ambient temperature: –40 to +70 °C –40 to +158 °F (Note 2)
	Zoom lens	**FX-MR2**		The spot diameter is adjustable from ø0.7 to ø2 mm ø0.028 to ø0.079 in according to how much the fiber is screwed in. • Applicable fibers: **FD-WG4**, **FD-G4** • Ambient temperature: –40 to +70 °C –40 to +158 °F (Note 2) • Accessory: **MS-EX-3** (mounting bracket) **Sensing range for red LED type** (Note 1)
	Finest spot lens	**FX-MR3**		Extremely fine spot of ø0.3 mm ø0.012 in approx. achieved. • Applicable fibers: **FD-WG4**, **FD-G4**, **FD-EG1**, **FD-EG2**, **FD-EG3**, **FD-G6X**, **FD-G6** • Ambient temperature: –40 to +70 °C –40 to +158 °F (Note 2) **Sensing range for red LED type** (Note 1)
	Finest spot lens	**FX-MR6**		Extremely fine spot of ø0.1 mm ø0.004 in approx. achieved. • Applicable fibers: **FD-WG4**, **FD-G4**, **FD-EG1**, **FD-EG2**, **FD-EG3**, **FD-G6X**, **FD-G6** • Ambient temperature: –20 to +60 °C –4 to +140 °F (Note 2) **Sensing range for red LED type** (Note 1)
	Zoom lens (Side-view type)	**FX-MR5**		**FX-MR2** is converted into a side-view type and can be mounted in a very small space. • Applicable fibers: **FD-WG4**, **FD-G4** • Ambient temperature: –40 to +70 °C –40 to +158 °F (Note 2) **Sensing range for red LED type** (Note 1)

Sensing range for red LED type (Note 1)

Screw-in depth	Distance to focal point	Spot diameter
7 mm 0.276 in	ø18.5 mm ø0.728 in approx.	ø0.7 mm ø0.028 in
12 mm 0.472 in	ø27 mm ø1.063 in approx.	ø1.2 mm ø0.047 in
14 mm 0.551 in	ø43 mm ø1.693 in approx.	ø2.0 mm ø0.079 in

Sensing range for red LED type (Note 1)

Fiber	Distance to focal point	Spot diameter
FD-EG3	7.5 ±0.5 mm 0.295 ±0.020 in	ø0.15 mm ø0.006 in approx
FD-EG2	7.5 ±0.5 mm 0.295 ±0.020 in	ø0.2 mm ø0.008 in approx
FD-EG1	7.5 ±0.5 mm 0.295 ±0.020 in	ø0.3 mm ø0.012 in approx
FD-WG4/G4/G6X/G6	7.5 ±0.5 mm 0.295 ±0.020 in	ø0.5 mm ø0.020 in approx

Sensing range for red LED type (Note 1)

Fiber	Distance to focal point	Spot diameter
FD-EG3	7 ±0.5 mm 0.276 ±0.020 in	ø0.1 mm ø0.004 in approx
FD-EG2	7 ±0.5 mm 0.276 ±0.020 in	ø0.15 mm ø0.006 in approx
FD-EG1	7 ±0.5 mm 0.276 ±0.020 in	ø0.2 mm ø0.008 in approx
FD-WG4/G4/G6X/G6	7 ±0.5 mm 0.276 ±0.020 in	ø0.4 mm ø0.016 in approx

Sensing range for red LED type (Note 1)

Screw-in depth	Distance to focal point	Spot diameter
8 mm 0.315 in	13 mm 0.512 in approx.	ø0.5 mm ø0.020 in
10 mm 0.394 in	15 mm 0.591 in approx.	ø0.8 mm ø0.031 in
14 mm 0.551 in	30 mm 1.181 in approx.	ø3.0 mm ø0.118 in

Notes: 1) The sensing ranges are the values when used in combination with red LED type amplifier. Please contact our office for details on sensing ranges for other types of amplifier.
2) Refer p.76~ for the ambient temperatures of fibers to be used in combination.

Others

Designation	Model No.			Description
Protective tube (For thru-beam type fiber)	**FTP-500** (0.5 m 1.641 ft)	For M4 thread	Applicable fibers: **FT-42** **FT-FM2S4** **FT-B8** **FT-H13-FM2** **FT-FM2** **FT-P60** **FT-FM2S** **FT-P80**	The protective tube, made of noncorrosive stainless steel, protects the inner fiber cable from any external forces.
	FTP-1000 (1 m 3.281 ft)			
	FTP-1500 (1.5 m 4.922 ft)			
	FTP-N500 (0.5 m 1.641 ft)	For M3 thread	**FT-31** **FT-P40** **FT-NFM2** **FT-T80** **FT-NFM2S** **FD-P40** **FT-NFM2S4** **FD-T40**	
	FTP-N1000 (1 m 3.281 ft)			
	FTP-N1500 (1.5 m 4.922 ft)			
Protective tube (For reflective type fiber)	**FDP-500** (0.5 m 1.641 ft)	For M6 thread	**FD-61** **FD-FM2S4** **FD-B8** **FD-H13-FM2** **FD-FM2** **FD-P80** **FD-FM2S**	
	FDP-1000 (1 m 3.281 ft)			
	FDP-1500 (1.5 m 4.922 ft)			
	FDP-N500 (0.5 m 1.641 ft)	For M4 thread	**FD-41** **FD-T80** **FD-NFM2** **FD-NFM2S** **FD-NFM2S4**	
	FDP-N1000 (1 m 3.281 ft)			
	FDP-N1500 (1.5 m 4.922 ft)			
Fiber bender	**FB-1**	The fiber bender bends the sleeve part of the fiber head at the proper radius. (Note 1)		
Universal sensor mounting stand (Note 2)	**MS-AJ1-F**	Horizontal mounting type	Mounting stand assembly for fiber (For M3,M4 or M6 threaded head fiber)	
	MS-AJ2-F	Vertical mounting type		
Single core holder	**FX-AT15A**	The incident light intensity may vary when using a multi-core fiber or a thin type sharp bending fiber. This holder suppresses the variation in the incident light intensity. Brown.		

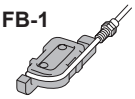
Notes: 1) Do not bend the sleeve part of any side-view type fiber or ultra-small diameter head type fiber.
2) Refer to the universal sensor mounting stand **MS-AJ** series pages for details.

Protective tube

• **FTP-□**
• **FDP-□**

Fiber bender

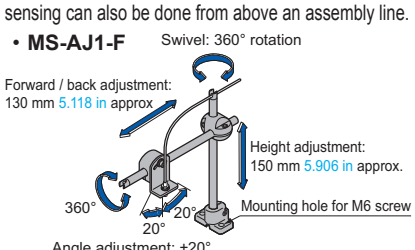
• **FB-1**



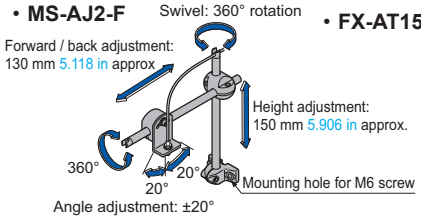
Universal sensor mounting stand

Using the arm which enables adjustment in the horizontal direction, sensing can also be done from above an assembly line.

• **MS-AJ1-F**



• **MS-AJ2-F**



Single core holder

• **FX-AT15A**

SPECIFICATIONS

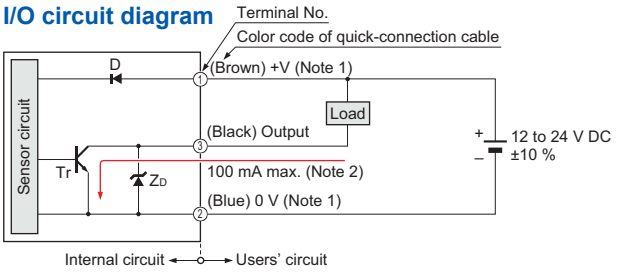
Item	Model No.	Standard type: Red LED	Standard type: Blue LED	Standard type: Green LED	Standard type: Infrared LED	High-speed type	High-function type
	NPN output	FX-301	FX-301B	FX-301G	FX-301H	FX-301-HS	FX-305
	PNP output	FX-301P	FX-301BP	FX-301GP	FX-301HP	FX-301P-HS	FX-305P
Supply voltage		12 to 24 V DC ±10 % Ripple P-P 10 % or less					
Power consumption		<Red LED / Infrared LED type> Normal operation: 960 mW or less (Current consumption 40 mA or less at 24 V supply voltage) ECO mode: 600 mW or less (Current consumption 25 mA or less at 24 V supply voltage)				<Blue LED / Green LED type> Normal operation: 720 mW or less (Current consumption 30 mA or less at 24 V supply voltage) ECO mode: 430 mW or less (Current consumption 18 mA or less at 24 V supply voltage)	
Output		<NPN output type> NPN open-collector transistor • Maximum sink current:100 mA (50 mA, if five, or more, amplifiers are connected in cascade.) • Applied voltage: 30 V DC or less (between output and 0 V) • Residual voltage: 1.5 V or less [at 100 mA (at 50 mA, if five, or more, amplifiers are connected in cascade) sink current.] <PNP output type> PNP open-collector transistor • Maximum source current: 100 mA (50 mA, if five, or more, amplifiers are connected in cascade.) • Applied voltage: 30 V DC or less (between output and +V) • Residual voltage: 1.5 V or less [at 100 mA (at 50 mA, if five, or more, amplifiers are connected in cascade) source current.]					<NPN output type> NPN open-collector transistor 2 outputs • Maximum sink current: 50 mA each (Note 2) • Applied voltage: 30 V DC or less (between output and 0 V) • Residual voltage: 1.5 V or less [at 50 mA (Note 2)] <PNP output type> PNP open-collector transistor 2 outputs • Maximum source current: 50 mA each (Note 2) • Applied voltage: 30 V DC or less (between output and +V) • Residual voltage: 1.5 V or less [at 50 mA (Note 2)]
Output operation		Selectable either Light-ON or Dark-ON, with jog switch					
Short-circuit protection		Incorporated					
Response time		65 µs or less [H-SP (Red LED type only)], 150 µs or less (FAST), 250 µs or less [STD / S-D (Red LED type only)], 2 ms or less (LONG), selectable with jog switch				35 µs or less (H-SP), 150 µs or less (FAST), 250 µs or less (STD / S-D), 2 ms or less (LONG), selectable with jog switch	65 µs or less (H-SP), 150 µs or less (FAST), 250 µs or less (STD), 700 µs or less (STDF), 2.5 ms or less (LONG), 4.5 ms or less (U-LG), selectable with jog switch
Sensitivity setting		2-point teaching / Limit teaching / Manual adjustment / Full-auto teaching / Max. sensitivity teaching					Normal mode: 2-point teaching / Limit teaching / Full-auto teaching / Max. sensitivity teaching / Manual adjustment Window comparator mode: Teaching (1-point / 2-point / 3-point) / Manual adjustment
Operation indicator		Orange LED (lights up when the output is ON)					
Stability indicator		Green LED (lights up under stable light received condition or stable dark condition)					———
MODE indicator		RUN: Green LED, TEACH • ADJ • L/D ON • TIMER • PRO: Yellow LED					
Digital display		4 digit red LED display					
Fine sensitivity adjustment function		Incorporated					
Timer function		Incorporated with variable ON-delay / OFF-delay / ONE SHOT timer, switchable either effective or ineffective. [Timer period: Red LED type; 0.5 ms approx., 1 to 9999 ms (Blue LED, Green LED, Infrared LED type; approx. 0.5 to 500 ms)]					Incorporated with variable ON-delay / OFF-delay / ONE SHOT / ON-delay • OFF-delay / ON-delay • ONE SHOT timer, switchable either effective or ineffective. (Timer period: Output 1; 0.5 ms, 1 to 9999 ms, Output 2; 0.5 ms, 1 to 500 ms)
Light emitting amount selection function		Incorporated (Red LED type only) (Note 3) FAST, STD, LONG: 4 level, H-SP: 3 level, S-D: 2 level				Incorporated (Note 3) FAST, STD, LONG: 4 level H-SP, S-D: 2 level	Incorporated (Note 3) FAST, STD, STDF, LONG, U-LG: 4 level H-SP: 3 level
Automatic interference prevention function		Incorporated (Up to four sets of fiber heads can be mounted close together. However, H-SP mode is 2 fiber heads.) (Note 4)				———	Incorporated [Up to four sets of fiber heads can be mounted close together. (However, U-LG mode is 8 fiber heads, H-SP mode is 2 fiber heads.)] (Note 5)
Environmental resistance: Ambient temperature		–10 to +55 °C +14 to +131 °F (If 4 to 7 units are connected in cascade: –10 to +50 °C +14 to +122 °F, if 8 to 16 units are connected in cascade: –10 to +45 °C +14 to +113 °F) (No dew condensation or icing allowed), Storage: –20 to +70 °C –4 to +158 °F					
Environmental resistance: Ambient humidity		35 to 85 % RH, Storage: 35 to 85 % RH					
Environmental resistance: Ambient illuminance		Incandescent light: 3,000 ℓx at the light-receiving face					
Environmental resistance: Voltage withstandability		1,000 V AC for one min. between all supply terminals connected together and enclosure (Note 6)					
Environmental resistance: Insulation resistance		20 MΩ, or more, with 250 V DC megger between all supply terminals connected together and enclosure (Note 6)					
Environmental resistance: Vibration resistance		10 to 150 Hz frequency, 0.75 mm 0.030 in amplitude in X, Y and Z directions for two hours each					
Environmental resistance: Shock resistance		98 m/s² acceleration (10 G approx.) in X, Y and Z directions for five times each					
Emitting element (modulated)		Red LED	Blue LED	Green LED	Infrared LED	Red LED	Red LED
Peak emission wavelength		650 nm 0.026 mil	470 nm 0.019 mil	525 nm 0.021 mil	940 nm 0.037 mil	650 nm 0.026 mil	650 nm 0.026 mil
Material		Enclosure: Heat-resistant ABS, Case cover: Polycarbonate, MODE key: Acrylic, Jog switch: Heat-resistant ABS (**FX-301B/G/H**: Acrylic)					
Connecting method		Connector (Note 7)					
Cable length		Total length up to 100 m 328.084 ft (50 m 164.042 ft for 5 to 8 units, 20 m 65.617 ft for 9 to 16 units) is possible with 0.3 mm², or more, cable.					
Weight		Net weight: 20 g approx., Gross weight: 25 g approx.					
Accessory		**FX-MB1** (amplifier protection seal): 1 set	———				**FX-MB1** (amplifier protection seal): 1 set

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +23 °C +73.4 °F.
2) 50 mA per output. 25 mA if five, or more, amplifiers are connected in cascade.
3) The light emitting amount can be zero (emission halt) in all modes.
4) When the power supply is switched on, the light emission timing is automatically set for interference prevention.
5) When the interference prevention function "ｲﾝﾀｰﾌ" is set, the number of mountable fiber heads becomes double.
Furthermore, take care that the response time also becomes double.
6) The voltage withstandability and the insulation resistance values given in the above table are for the amplifier only.
7) The cable for amplifier connection is not supplied as an accessory. Make sure to use the optional quick-connection cables given below.
Main cable (3-core) for **FX-301**(**P**)(**-HS**): **CN-73-C1** (Cable length 1 m 3.281 ft), **CN-73-C2** (Cable length 2 m 6.562 ft), **CN-73-C5** (Cable length 5 m 16.404 ft)
Sub cable (1-core) for **FX-301**(**P**)(**-HS**): **CN-71-C1** (Cable length 1 m 3.281 ft), **CN-71-C2** (Cable length 2 m 6.562 ft), **CN-71-C5** (Cable length 5 m 16.404 ft)
Main cable (4-core) for **FX-305**(**P**): **CN-74-C1** (Cable length 1 m 3.281 ft), **CN-74-C2** (Cable length 2 m 6.562 ft), **CN-74-C5** (Cable length 5 m 16.404 ft)
Sub cable (2-core) for **FX-305**(**P**): **CN-72-C1** (Cable length 1 m 3.281 ft), **CN-72-C2** (Cable length 2 m 6.562 ft), **CN-72-C5** (Cable length 5 m 16.404 ft)

I/O CIRCUIT AND WIRING DIAGRAMS

FX-301(-HS) — NPN output type

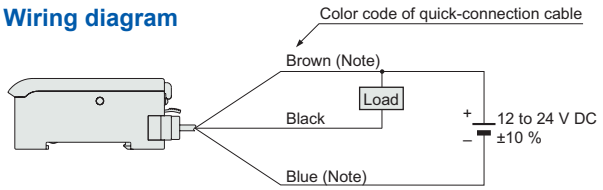
I/O circuit diagram



Notes: 1) The quick-connection sub cable does not have +V (brown) and 0 V (blue). The power is supplied from the connector of the main cable.
2) 50 mA max., if five amplifiers, or more, are connected together.

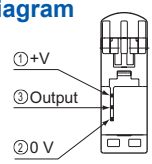
Symbols … D : Reverse supply polarity protection diode
ZD: Surge absorption zener diode
Tr : NPN output transistor

Wiring diagram



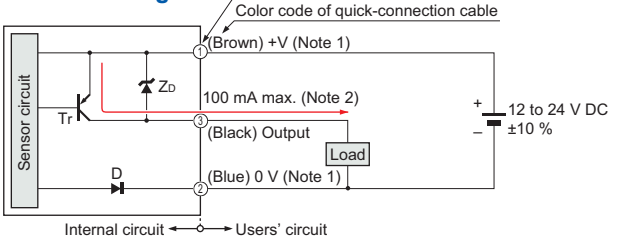
Note: The quick-connection sub cable does not have brown lead wire and blue lead wire.

Terminal arrangement diagram



FX-301P(-HS) — PNP output type

I/O circuit diagram



Notes: 1) The quick-connection sub cable does not have +V (brown) and 0 V (blue). The power is supplied from the connector of the main cable.
2) 50 mA max., if five amplifiers, or more, are connected together.

SENSING CHARACTERISTICS (TYPICAL)

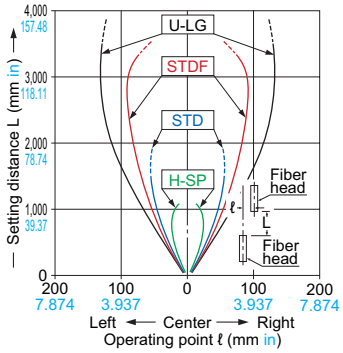
The following sensing characteristics pertain to the **FX-300** red LED type.Please contact our office for the sensing characteristics pertaining corresponding to types other than the red LED or to types not mentioned here.

Thru-beam type Parallel deviation

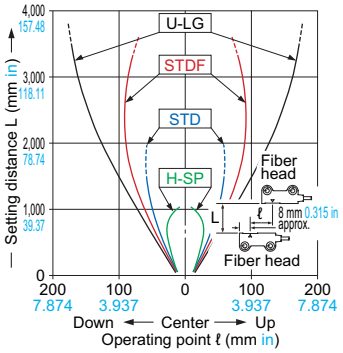
Sensing characteristics are listed by model No. in alphabetical order. (However, models with the same sensing characteristics are listed together.)

FT-A8 FT-WA8 — Thru-beam type

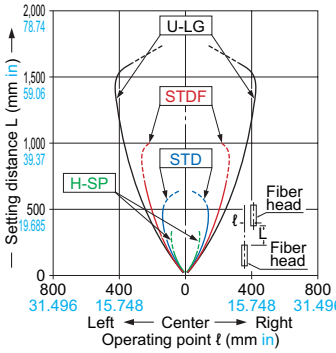
Horizontal direction



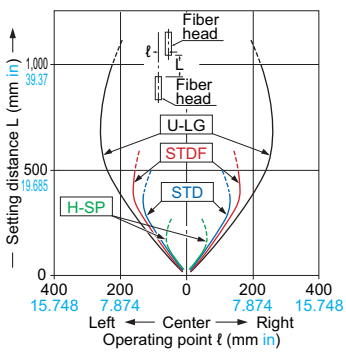
Vertical direction



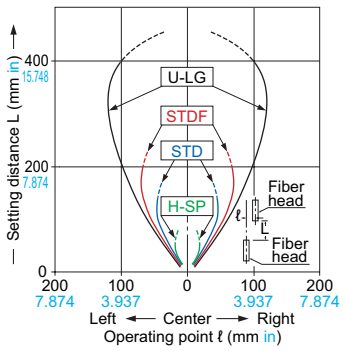
FT-B8 — Thru-beam type



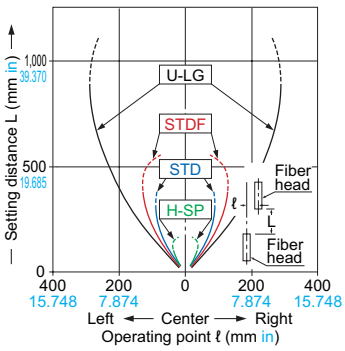
FT-FM2 FT-FM2S FT-FM2S4 FT-SFM2 FT-T80 — Thru-beam type



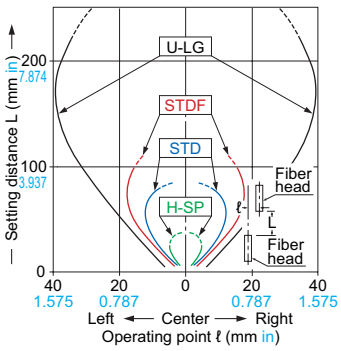
FT-NFM2 FT-NFM2S FT-NFM2S4 FT-SNFM2 — Thru-beam type



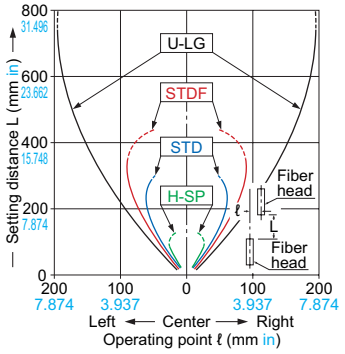
FT-P81X — Thru-beam type



FT-W4 FT-WS4 — Thru-beam type



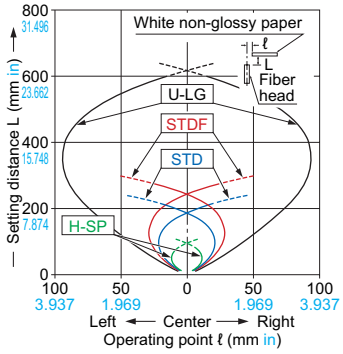
FT-W8 FT-WS8 — Thru-beam type



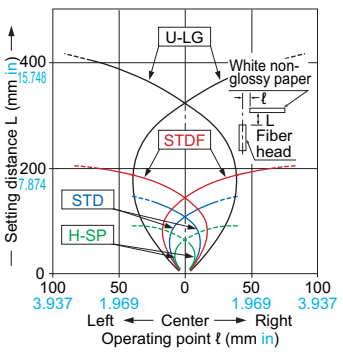
Reflective type Sensing fields

Sensing characteristics are listed by model No. in alphabetical order. (However, models with the same sensing characteristics are listed together.)

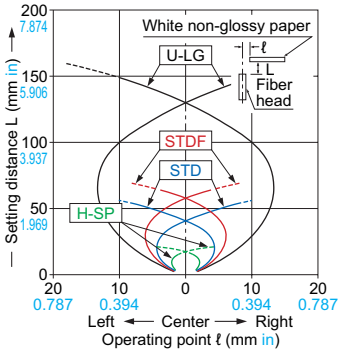
FD-B8 — Reflective type



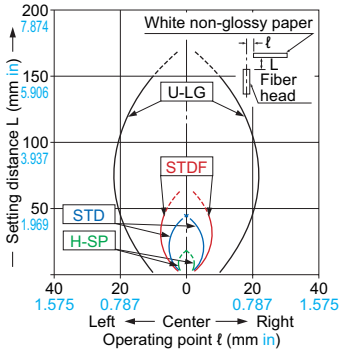
FD-FM2 — Reflective type



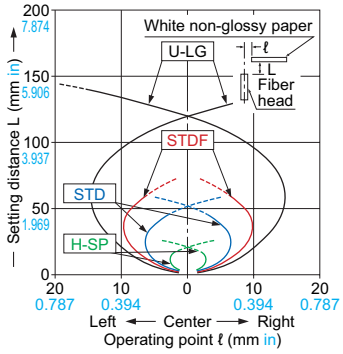
FD-G4 — Reflective type



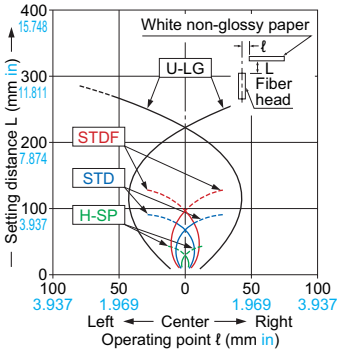
FD-G6X — Reflective type



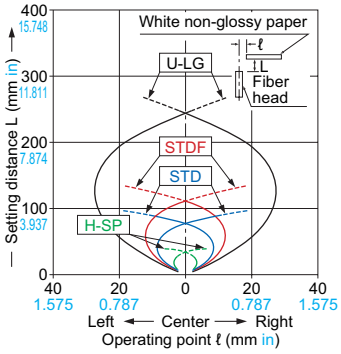
FD-NFM2 FD-NFM2S FD-NFM2S4 FD-SNFM2 FD-T40 — Reflective type



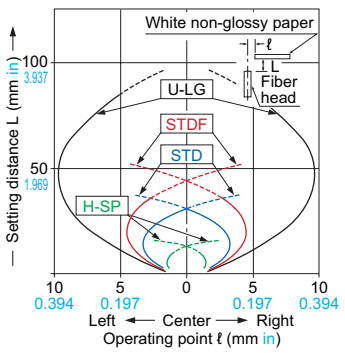
FD-P81X — Reflective type



FD-W8 FD-WS8 FD-WT8 — Reflective type



FD-WG4 FD-WSG4 — Reflective type



PRECAUTIONS FOR PROPER USE

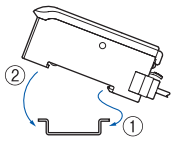
Refer to General precautions, p.80~ for fiber precautions, and to the “PRO mode operation guide” on our website for details pertaining to operating instructions for the amplifier.

- Never use this product as a sensing device for personnel protection.
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

- The digital fiber sensor **FX-301**(**P**) has been modified since its production in June 2004. The explanations below are about the modified product.

Mounting

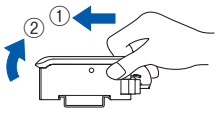
How to mount the amplifier



35 mm 1.378 in width DIN rail

① Fit the rear part of the mounting section of the amplifier on a 35 mm 1.378 in width DIN rail.
② Press down the rear part of the mounting section of the unit on the 35 mm 1.378 in width DIN rail and fit the front part of the mounting section to the 35 mm 1.378 in width DIN rail.

How to remove the amplifier

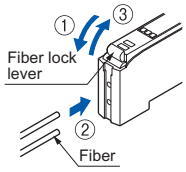


① Push the amplifier forward.
② Lift up the front part of the amplifier to remove it.

Note: Take care that if the front part is lifted without pushing the amplifier forward, the hook on the rear portion of the mounting section is likely to break.

Fiber installation

- Insert the fiber into the amplifier after attaching the attachment. Refer to the "Instruction Manual" included with the fiber for details.



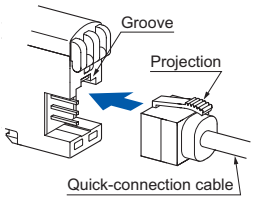
① Push the fiber lock lever down.
② Slowly insert the fiber into the insertion slot until it stops. (Note 1)
③ Push the fiber lock lever back up until it stops.

Notes: 1) Note that if the fiber is not fully inserted, the sensing distance will decrease. Also note that the flexible fiber may bend during insertion.
2) In case of coaxial reflective type fibers (**FD-G4**, **FD-FM2**, etc.), mount the central fiber (single-core) to the emitter part and the peripheral fiber (multi-core) to the receiver. Note that sensing precision will deteriorate when done in reverse.

Connection

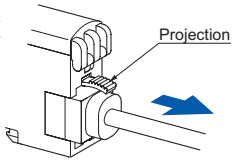
- Make sure that the power supply is off while connecting or disconnecting the quick-connection cable.

Connection method



① Holding the connector of the quick-connection cable, align its projection with the groove at the top portion of the amplifier connector.
② Insert the connector till a click is felt.

Disconnection method



① Pressing the projection at the top of the quick-connection cable, pull out the connector.

Note: Take care that if the connector is pulled out without pressing the projection, the projection may break. Do not use a quick-connection cable whose projection has broken. Further, do not pull by holding the cable, as this can cause a cable-break.

Cascading

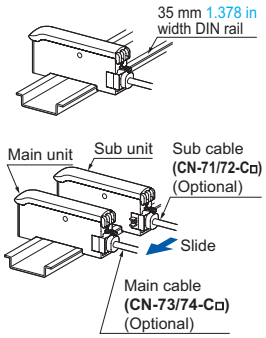
- Make sure that the power supply is off while adding or removing the amplifiers.
- Make sure to check the allowable ambient temperature, as it depends on the number of amplifiers connected in cascade.
- In case two, or more, amplifiers are connected in cascade, make sure to mount them on a DIN rail.
- When the amplifiers move on the DIN rail depending on the attaching condition or the amplifiers are mounted close to each other in cascade, fit them between the optional end plates (**MS-DIN-E**) mounted at the two ends.
- Up to maximum 15 amplifiers can be added (total 16 amplifiers connected in cascade.)
- When connecting more than two amplifiers in cascade, use the sub cable (**CN-71-C**□ / **CN-72-C**□) as the quick-connection cable for the second amplifier onwards.
- When connecting amplifiers not close to each other in parallel, be sure to mount the optional end plate (**MS-DIN-E**) at both sides of each amplifier or affix the communication window seal of the accessory amplifier protection seal (**FX-MB1**) to the communication windows.
- The settings other than the interference prevention function cannot be transmitted between **FX-301**(**P**) **FX-301B/G/H**(**P**), **FX-305**(**P**). Therefore, in case both models of amplifiers are mounted in cascade, be sure to mount identical models together. However, the interference prevention function is not incorporated in the **FX-301**(**P**)**-HS**. Take care when the sensors are mounted in cascade.
- If the **FX-301**(**P**) updated version unit or the **FX-305**(**P**) is mounted with the **FX-301**(**P**) previous version unit or the **FX-301B/G/H**(**P**) in cascade, place the **FX-301**(**P**) updated version units and the **FX-305**(**P**) units to the right side (seen from the connector side) of the previous version units. For details, refer to “**Cautions on sensor connection in cascade**”.
  For a difference between the updated version unit and the previous version unit, refer to “**A difference between the updated version unit and the previous version unit**”.
- The communication function of this product and that of the **FX-301**(**P**)**-F / F7** is different. If these models are mounted in cascade, affix the accessory fiber amplifier protection seal (**FX-MB1**) included in the **FX-301**(**P**) and **FX-305**(**P**) to the communication windows of the amplifiers.

PRECAUTIONS FOR PROPER USE

Refer to General precautions, p.80~ for fiber precautions, and to the “PRO mode operation guide” on our website for details pertaining to operating instructions for the amplifier.

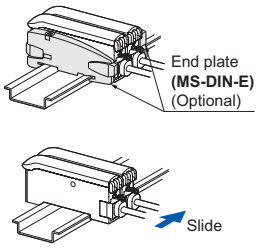
Cascading method

① Mount the amplifiers, one by one, on the 35 mm 1.378 in width DIN rail.
② Slide the amplifiers next to each other, and connect the quick-connection cables.
③ Mount the optional end plates (**MS-DIN-E**) at both the ends to hold the amplifiers between their flat sides.
④ Tighten the screws to fix the end plates.



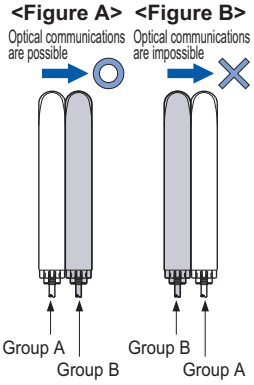
Dismantling

① Loosen the screws of the end plates.
② Remove the end plates.
③ Slide the amplifiers and remove them one by one.



Cautions on sensor connection in cascade

• When the units in the group A and the group B shown in the table below are connected in cascade, connect them in cascade as **<Figure A>** shown below.



Group A	**FX-301**(**P**): Previous version unit (Note 1), **FX-301G**(**P**)/**B**(**P**)/**H**(**P**), **FX-41**□(**P**), **LS-401**(**P**) (Note 2)
Group B	**FX-301**(**P**): Updated version unit (Note 1), **FX-305**(**P**)

Notes: 1) For the difference between the updated version unit and the previous version unit, refer to “**A difference between the updated version unit and the previous version unit**”.
2) When **LS-401**(**P**) is connected with the digital fiber amplifier in cascade, be sure to locate **LS-401**(**P**) at the left-most position (when viewed from the connector side).

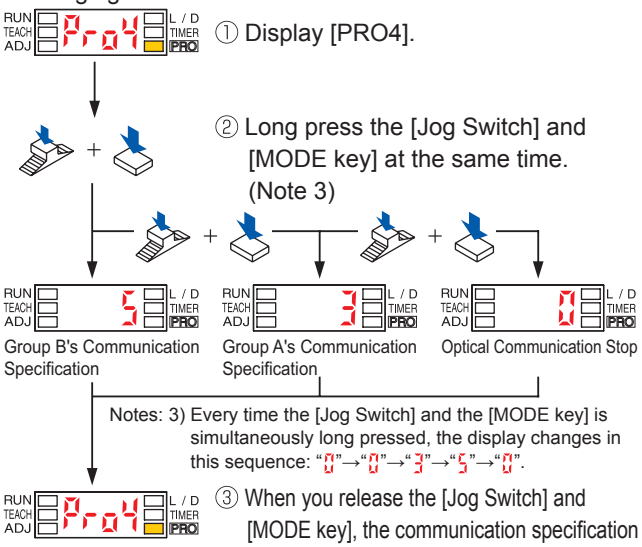
• When the units of the group A and the group B are connected in cascade as **<Figure B>** shown above, optical communications cannot be done. When the optical communications function is used, connect them as **<Figure A>** shown above. If the units cannot be placed as **<Figure A>**, the following measure ① or ② should be taken.

① Affix the communication window seal of the accessory fiber amplifier protection seal (**FX-MB1**) to the communication window of the **FX-301**(**P**) updated version unit or **FX-305**(**P**).
② If the measure ① described above cannot be taken, change the optical communications spec. of the group B units.

How to change the communication specification of Group B

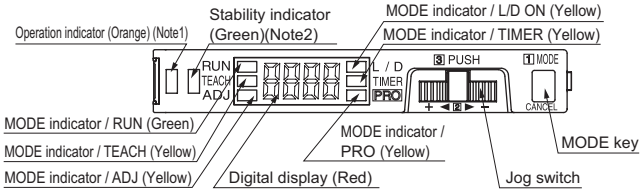
• Change the communication specification of Group B according to the following procedures. Make sure to set the communication specification to “3 (Group A communication specification)” or “0 (Optical Communication Stop)”.

<Changing Procedure>



Notes: 4) When the communication specification is set to “3 (Group A communication specification)”, make sure to tightly attach the products. Also make sure to take note of the following:
• There are instances when the optical communication function cannot be used due to the usage environment, etc.
• Do not perform batch channel loading or saving.

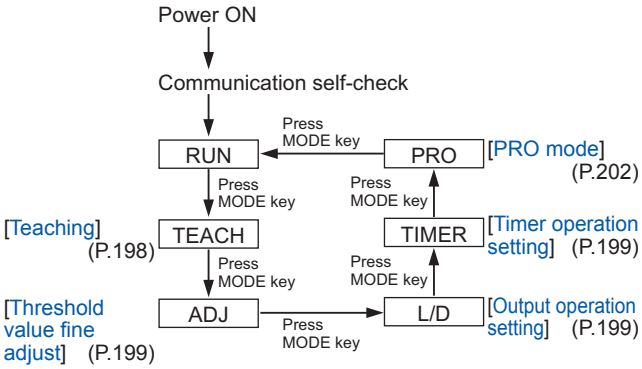
Part description



Notes: 1) **FX-305**(**P**); Output 1 operation indicator (Orange)
2) **FX-305**(**P**); Output 2 operation indicator (Orange)

Operation procedure

• When the power supply is switched on, communication self-check is carried out and normal condition is displayed [MODE indicator / RUN (green)] lights up and the digital display shows the incident light intensity.
• When the MODE key is pressed, the mode will change as shown in the following diagram.



When Jog switch is pressed, the setting is confirmed.
When MODE key is pressed for 2 sec., or more, the sensor returns to the ‘RUN’ mode.
Cancellation is possible by pressing MODE key during setting.

PRECAUTIONS FOR PROPER USE

Refer to General precautions, p.80~ for fiber precautions, and to the "PRO mode operation guide" on our website for details pertaining to operating instructions for the amplifier.

For FX-305(P)

The **FX-305**(**P**) is equipped with two independent outputs, but the items that can be set in output 1 and output 2 respectively are only the following.
The items other than those are common.
① Threshold value ② Output operation
③ Timer operation and Timer period ④ Sensing mode

Teaching

- The threshold values can be set by 2-point teaching, limit teaching, full-auto teaching or window comparator mode (1-point, 2-point, 3-point teaching) [only for **FX-305**(**P**)], when the MODE indicator / TEACH (yellow) lights up.

In case of 2-point teaching

- This is the method of setting the threshold value by teaching two levels, corresponding to the object present and object absent conditions. Normally, setting is done by this method.

Step	Description	Display
①	Set the fiber within the sensing range. Press MODE key to light up MODE indicator / TEACH (yellow). 	1234
②	For **FX-305**(**P**), select either Output 1 "Out 1" or Output 2 "Out 2" beforehand, press jog switch in the object present condition. If the teaching is accepted, the read incident light intensity blinks in the digital display. 	567
③	MODE indicator / TEACH (yellow) blinks. Press jog switch in the object absent condition. 	1234
④	If the teaching is accepted, the read incident light intensity blinks in the digital display and the threshold value is set at the mid-value between the incident light intensities in the object present and the object absent conditions. After this, the judgment on the stability of sensing is displayed. • In case stable sensing is possible: "Good" is displayed. • In case stable sensing is not possible: "UNSt" blinks.	Good UNSt
⑤	The threshold value is displayed.	900
⑥	"----" blinks in the digital display. (only **FX-301B/G/H**)	----
⑦	The incident light intensity appears in the digital display and the setting is complete.	1234

Notes: 1) Do not move or bend the fiber cable after the sensitivity setting. Detection may become unstable.
2) In case a reflective-type fiber is used, maximum sensitivity will be set if the jog switch is pushed while in no work status in procedure ② and ③.

In case of full auto-teaching

- Full auto-teaching is used when it is desired to set the threshold value without stopping the assembly line, with the object in the moving condition.

Step	Description	Display
①	Set the fiber within the sensing range. Press MODE key to light up MODE indicator / TEACH (yellow). 	1234
②	For **FX-305**(**P**), select either Output 1 "Out 1" or Output 2 "Out 2" beforehand, press the jog switch continuously for 0.5 sec. or more with the object moving on the assembly line. (The incident light intensity is displayed during sampling.)	1234
③	"Auto" is displayed on the digital display. Release the jog switch when the object has passed.	Auto
④	If the teaching is accepted, the read incident light intensity blinks in the digital display and the threshold value is set at the mid-value between the incident light intensities in the object present and the object absent conditions. After this, the judgment on the stability of sensing is displayed. • In case stable sensing is possible: "Good" is displayed. • In case stable sensing is not possible: "UNSt" blinks.	Good UNSt
⑤	The threshold value is displayed.	900
⑥	"----" blinks in the digital display. (only **FX-301B/G/H**)	----
⑦	The incident light intensity appears in the digital display and the setting is complete.	1234

Notes: 1) The threshold value's shift amount can be selected in PRO mode. Refer to the "PRO Mode Operation Guide" for more details pertaining to setting instructions. (Increments of 5 % between –45 and 45 % for setting possible. 0 % default.)
2) Do not move or bend the fiber cable after the sensitivity setting. Detection may become unstable.

PRECAUTIONS FOR PROPER USE

Refer to General precautions, p.80~ for fiber precautions, and to the “PRO mode operation guide” on our website for details pertaining to operating instructions for the amplifier.

In case of limit teaching

- This is the method of setting the threshold value by teaching only the object absent condition (stable incident light condition). This is used for detection in the presence of a background body or for detection of small objects.

Step	Description	Display
①	Set the fiber within the sensing range. Press MODE key to light up MODE indicator / TEACH (yellow). 	1234
②	For **FX-305**(**P**), select either Output 1 “Out 1” or Output 2 “Out 2” beforehand, press jog switch in the object absent condition. If the teaching is accepted, the read incident light intensity blinks in the display. Thru-beam type Reflective type 	1234
③	MODE indicator / TEACH (yellow) blinks. Turn jog switch to the “+” side or “–” side.	1234
④	If jog switch is turned to the “+” side, “ ” scrolls (twice) the display from right to left (Note 1), and the threshold level is shifted to a value approx. 15 % higher (lower sensitivity) than that set at ②. (Note 2) This is used in case of reflective type fibers.  If jog switch is turned to the “–” side, “ ” scrolls (twice) the display from left to right, and the threshold level is shifted to a value approx. 15 % lower (higher sensitivity) than that set at ②. (Note 2) This is used in case of thru-beam type fibers.  	
⑤	After this, the judgment on whether the setting shift amount can be shifted or not is displayed. • In case shifting is possible: “Good” blinks. • In case shifting is not possible: “HArd” blinks.	Good HArd
⑥	The threshold value is displayed.	300
⑦	“- - - -” blinks in the digital display. (only **FX-301B/G/H**)	- - - -
⑧	The incident light intensity appears in the digital display and the setting is complete.	1234

Notes: 1) Scrolling display is not available in **FX-301B/G/H**.
2) The approx. 15 % amount of shift is the initial value. The amount of shift can be changed in the PRO mode from approx. 5 to 80 % (5 % step). Refer to the “PRO Mode Operation Guide” for more details pertaining to setting instructions.
3) Do not move or bend the fiber cable after the sensitivity setting. Detection may become unstable.

Please download the instruction manual from our website for setting of threshold value when used in combination with liquid level sensing fiber **FD-F8Y** and with pipe-mountable liquid level sensing fiber **FD-F4**□.

For the wind comparator mode teaching in **FX-305**(**P**), refer to the separately prepared “PRO Mode Operation Guide”.

Threshold value fine adjustment

Step	Description	Display
①	Press MODE key to light up MODE indicator / ADJ (yellow). 	———
②	For **FX-305**(**P**), select either Output 1 “Out 1” or Output 2 “Out 2” beforehand, in case the threshold value is to be increased (sensitivity to be reduced), turn the jog switch to the “+” side to increase the threshold value slowly. If the jog switch is turned continuously to the “+” side, the threshold value increases rapidly. In case the threshold value is to be decreased (sensitivity to be increased), turn the jog switch to the “–” side to decrease the threshold value slowly. If the jog switch is turned continuously to the “–” side, the threshold value decreases rapidly.  	1234 1235 or 1234 1233
③	When jog switch is pressed, the threshold value is confirmed. 	———

Output operation setting

Step	Description	Display
①	Press MODE key to light up MODE indicator / L/D ON (yellow). 	L-on Displays present setting
②	For **FX-305**(**P**), select either Output 1 “Out 1” or Output 2 “Out 2” beforehand, if the jog switch is turn to the “+” or “–” direction, the output operation setting will change. 	Light state L-on d-on Dark state
③	When jog switch is pressed, the threshold value is confirmed. 	d-on Displays selected setting

Timer operation setting

- The setting for whether the timer is used or not can be done when MODE indicator / TIMER (yellow) lights up. For **FX-301B/G/H**, the timer type can be set in PRO mode.
- Further, an OFF-delay (initial value) which is useful when the response of the connected device is slow, etc., an ON-delay which is useful to detect only objects taking a long time to travel, and ONE SHOT, which is useful when the input specifications of the connected device require a signal of a fixed width, are possible with the **FX-301**□(**-HS**). **FX-305**(**P**) is also equipped with ON-delay • OFF-delay and ON-delay • ONE SHOT timers. Refer to the “PRO Mode Operation Guide” for the setting method of the OFF-delay, ON-delay and ONE SHOT timer intervals.

PRECAUTIONS FOR PROPER USE

Refer to General precautions, p.80~ for fiber precautions, and to the "PRO mode operation guide" on our website for details pertaining to operating instructions for the amplifier.

Wiring

- Make sure that the power supply is off while wiring.
- Verify that the supply voltage variation is within the rating.
- Take care that if a voltage exceeding the rated range is applied, or if an AC power supply is directly connected, the product may get burnt or damaged.
- If power is supplied from a commercial switching regulator, ensure that the frame ground (F.G.) terminal of the power supply is connected to an actual ground.
- In case noise generating equipment (switching regulator, inverter motor, etc.) is used in the vicinity of this product, connect the frame ground (F.G.) terminal of the equipment to an actual ground.
- Take care that short circuit of the load wrong wiring may burn or damage the product.
- Do not run the wires together with high-voltage lines or power lines or put them in the same raceway. This can cause malfunction due to induction.
- Make sure to use an isolation transformer for the DC power supply. If an autotransformer (single winding transformer) is used, this product or the power supply may get damaged.
- Make sure to use the optional quick-connection cable for the connection of the amplifier. Extension up to total 100 m 328.084 ft is possible with 0.3 mm^2, or more, cable. (5-8 unit expansion: 50 m 164.042 ft, 9-16 unit expansion: 20 m 65.617 ft) However, in order to reduce noise, make the wiring as short as possible.
- Note that the residual voltage will increase when the cable is extended.

Key-lock function

- If jog switch and MODE key are pressed for more than 2 sec. at the same time in 'RUN' mode condition, the key operations are locked, and only the threshold value confirmation function or the adjust function (valid only when the adjust lock function is canceled) is valid. To cancel the lock function, press both the keys for more than 2 sec. once again.
  Note: 3 seconds or more for **FX-301B/G/H(P)**.

Others

- When the emission halt of the light emitting amount selection function is set from "OFF" to "ON", the output may be unstable. Do not use the output control for 0.5 sec. after starting emission.
- Do not use during the initial transient time (0.5 sec.) after the power supply is switched on.
- Take care that the sensor is not directly exposed to fluorescent lamp from a rapid-starter lamp, a high frequency lighting device or sunlight etc. , as it may affect the sensing performance.
- Do not use this sensor in places having excessive vapor, dust, etc., or where it may come in contact with corrosive gas.
- Take care that the product does not come in direct contact with water, oil, grease, or organic solvents, such as, thinner, etc.
- This sensor cannot be used in an environment containing inflammable or explosive gases.
- Never disassemble or modify the sensor.

Function table for FX-300 series

	Previous models			New models		
	Standard type	High-function type	High-speed type	Standard type	High-speed type	High-function type
	FX-301(P) (Previous version unit)	**FX-302(P)**	**FX-303(P)**	**FX-301(P)** (Updated version unit)	**FX-301(P)-HS**	**FX-305(P)**
Four-chemical emitting element + APC circuit	No	No	No	Yes	Yes	Yes
Four-chemical emitting element only	Yes (Note)	Yes	Yes	———	———	———
Light emitting amount selection function	No	No	No	Yes	Yes	Yes
Reduced intensity mode (S-D)	Yes (Note)	Yes	No	Yes	Yes	———
9,999 digit display	No	No	No	No	No	Yes
Response time (Max. speed)	150 µs	300 µs	90 µs	65 µs	35 µs	65 µs
Interference prevention function (Effective no. of units)	Incorporated (4)	Incorporated (8)	Not incorporated (0)	Incorporated (4)	Not incorporated (0)	Incorporated (16)
Independent 2 outputs	No	No	No	No	No	Yes
Alarm output function	No	No	No	No	No	Yes
Error output function	No	No	No	No	No	Yes
Differential sensing	No	No	No	No	No	Yes
Window comparator mode	No	Yes	No	No	No	Yes
Peripheral units that can be combined						
Bank selection unit **FX-CH(-P)**	Yes	Yes	No	No	No	No
External input unit **FX-CH2(-P)**	No	No	No	Yes	No	Yes
Upper communication unit **SC-GU1-485**	No	No	No	Yes	No	Yes

Note: Except **FX-301B/G/H**.

PRECAUTIONS FOR PROPER USE

Refer to General precautions, p.80~ for fiber precautions, and to the “PRO mode operation guide” on our website for details pertaining to operating instructions for the amplifier.

A difference between the updated version unit and the previous version unit for FX-301(P) (Red LED type)

- The product has been modified as shown below since its production in June 2004.

Changes in appearance

Before change	After change
Top view 	**Top view** Side view 	**Side view** 
* “NAVI” is printed only on the both sides	* “NAVI” is printed only on a side

- Checking minor changes between previous and updated models can be done by checking whether the printing is on both sides or only one side.

Upgraded functions

1. Response times added

An ultra high-speed mode (H-SP) has been added to the existing 4 response time modes [high-speed (FAST), reduced intensity (S-D), standard (STD) and long range (LONG)].
This is changed using “Prot” in “SPEd”

Before change	After change
4 steps	**5 steps**
FAST 150 µs (FAST)	H-SP **65 µs (added) (H-SP)**
S-d 250 µs (S-D)	FAST 150 µs (FAST)
Std 250 µs (STD)	S-d 250 µs (S-D)
Long 2 ms (LONG)	Std 250 µs (STD)
	Long 2 ms (LONG)

2. Extension of timer period

The setting range for the timer period was previously 500 ms, but this has been extended to a new range of 9,999 ms.

3. Light emitting amount selection function

The light emitting amount can be changed to one of 4 levels (5 levels when emission halt is included).

4. Backup, copy lock and key lock functions added

Backup: This selects whether or not threshold values set by teaching are written to (stored in) an EEPROM.
Copy lock: This selects whether copy function and data bank function communication are possible or not.
Key lock: This disables input using switches to prevent accidental changing of settings.

Changes in operation

1. Timer selection method

Previous version unit: Timer type was changed using PRO1 mode. The “TIMER” setting in NAVI mode could only be turned on or off.
After change: The type of timer can be changed using the “TIMER” function in NAVI mode.

2. Checking threshold value in RUN mode

The threshold values can be checked by turning the jog switch.

Display changes

1. Checking blinking of sensitivity surplus

The stable surplus display method after teaching has been changed.

Previous version unit: Sensitivity surplus is indicated by the number of blinks of the stability indicator.

After change 9000 HArd

Digital display only

2. Initial direct code value changed

The factory default settings for the direct codes have been changed.

Previous version unit 0000 → **After change 0004**

* The default setting for the timer period is 10 ms, and the direct code for 10 ms is “4”, so this has been changed.

Internal circuit changes

1. Addition of an APC circuit

A four-chemical emitting element which provides stable sensing over long periods has been added, as well as an APC (Auto Power Control) circuit that improves stability during short periods.

Cautions on sensor connection in cascade

When connecting the previous version unit (including **FX-301B/G/H**) and updated version unit to be used in a cascade, refer to “**Cautions on sensor connection in cascade**”.

PRECAUTIONS FOR PROPER USE

Refer to General precautions, p.80~ for fiber precautions, and to the "PRO mode operation guide" on our website for details pertaining to operating instructions for the amplifier.

Diagram of functions and settings

The amplifier features and settings are generally classified into two main modes; the "NAVI mode" for items and settings that are frequently reconfigured, and the "PRO mode" that contains more detailed settings.

NAVI mode

RUN Run
This indicates normal sensing operation.

TEACH Teaching
The "threshold value" can be set by utilizing either "2-point teaching", "limit teaching", or "full-auto teaching".
* When the **FX-305(P)** is in window comparator mode, the "threshold value" can be set by either "1-point teaching", "2-point teaching" or "3-point teaching".

ADJ Adjust
Allows fine adjustment of the "threshold value".

PRO Pro
Allows various detailed settings to be configured, such as optical communications, save / load and other settings.

TIMER Timer
Configures operation of the timer.

L/D L-ON / D-ON
Sets output operation either Light-ON, or Dark-ON.

PRO mode

PRO1

- **SPEd** Response Time Change — Switches among response times.
- **dELY** Timer Setting — Configures timer operation.
- **HYS** Hysteresis — Sets hysteresis level.
- **PotL** Light Emitting Amount Selection — Changes the light emitting amount selection setting. [**FX-301(P)(-HS)**, **FX-305(P)** only]
- **SHFt** Shift — Shifts the "threshold value" by a certain percentage increment in "limit teaching".
- **Stb** Stability — Permits selection of stability indicator response levels for changes in the range for lighting up. [excluding the **FX-305(P)**]

PRO2

- **diSP** Digital Display Setting — Allows selection of different content to be indicated in the digital display.
- **turn** Digital Display Inversion — Sets the viewing orientation of the digital display.
- **Eco** ECO Mode — Sets the digital display to turn ON / OFF.

PRO3

- **chLO** Data Bank Load — Loads configuration setting from the data bank.
- **chSA** Data Bank Save — Saves configuration setting into the data bank.

PRO4

The FX-301(P)-HS is not equipped with a PRO4 setting function.

- **CoPY** Copy — Using optical communications, configuration settings from the main unit are copied to connected sub units all at once.
- **chLO** Remote Data Bank Load — Using optical communication, configuration settings can be loaded from respective data banks all at once.
- **chSA** Remote Data Bank Save — Using optical communication, current configuration settings can be saved into respective data banks all at once.
- **bUP** Backup — Allows not to save the threshold value, by teaching via external input in EEPROM. [**FX-301(P)**, **FX-305(P)** only]
- **CoMM** Communication Change To Permit / Not to Permit — When using optical communication for carrying out copy / load / save operations all at once, this function allows optical communication to pass through the unit.
- **tESt** Test — Verifies whether optical communications have been properly established. (**FX-301B/G/H** only)

PRO5

- **CodE** Code — Allows basic configuration information to be set in a single step, by inputting a 4-digit code.
- **ALC** Adjust Lock — Allows fine adjustment of the "threshold value" to be directly performed during RUN mode.
- **rSEt** Reset — All settings, except for data bank information, revert to factory settings.
- **inPr** Interference Prevention Switching — Switches the number of units for which interference prevention switching is enabled. * **FX-305(P)** only.

PRO6 Available only in FX-305(P) — The items that can be set are different for output 1 and output 2.

- **nor** Normal Mode — Sets a threshold value for ON / OFF operation.
- **Output 1**
  - **WIn** Window Comparator Mode — Judges if set two threshold values are within the required range or not. This can be selected in 1-point / 2-point / 3-point teaching.
  - **d.F** Rising Differential Mode — Sensing mode that cancels out slight changes in light intensity so that only sudden increases in incident light intensity are sensed.
  - **d.F** Trailing Differential Mode — Sensing mode that cancels out slight changes in light intensity so that only sudden decreases in incident light intensity are sensed.
- **Output 2**
  - **Aout** Error Output — Output when overcurrent occurs or when a communication error occurs from connected incompletely.
  - **SELF** Alarm Output — Be used as alarm output when the threshold value for output 2 is linked to output 1 and the light amount drops.

* The 0-ADJ setting function equipped on the **FX-301**□ and **FX-305(P)** has been deleted since the production in May 2005.

DIMENSIONS (Unit: mm in)

The CAD data in the dimensions can be downloaded from our website.
