

RA4M1 Clicker

PID: MIKROE-4350

RA4M1 Clicker is an amazingly compact starter development kit which brings innovative mikroBUS™ host socket to your favorite microcontroller. This board features all you need to get started: 32-bit R7FA4M1AB3CFM microcontroller, J-Link OB, USB connector, two LEDs and push buttons, reset button and headers for interfacing with external electronics.

Mikroe produces entire development toolchains for all major microcontroller architectures.

Committed to excellency, we are dedicated to helping engineers bring the project development up to speed and achieve outstanding results.

ISO 27001: 2013 certification of informational security management system.
 ISO 14001: 2015 certification of environmental management system.
 OHSAS 18001: 2008 certification of occupational health and safety management system.

ISO 9001: 2015 certification of quality management system (QMS).

Specifications

Type	Clicker
Architecture	ARM (32-bit)
Programming	External,J-Link OB
Silicon Vendor	Renesas Electronics
mikroBUS No.	1
Supply Voltage	USB
Category	Clicker
