

## RedyKit for the ADP2503 Buck-Boost Converter

### FEATURES

- All-voltage option for evaluation
- Surface-mount ADP2503 parts that can be easily soldered
- Additional parts for prototyping

### ADP2503CPZ-REDYKIT CONTENTS

- 1 each ADP2503-3.3-EVALZ evaluation board  $V_{OUT}$  3.3 V
- 1 each ADP2503-5.0-EVALZ evaluation board  $V_{OUT}$  5.0 V
- 3 each ADP2503 voltage options in a labeled bag

Figure 1. RedyKit Package

### GENERAL DESCRIPTION

The ADP2503CPZ-RedyKit allows simplified prototyping and evaluation and is available for every standard fixed output voltage option in the ADP2503 product family. The kit allows the user to evaluate the voltage options with one easy to order kit.

All surface-mount ADP2503 parts come sorted and stored in the kit with the ADI part number and fixed output voltage clearly printed on each zip-top bag (see Figure 5).

The kit can be used in the engineering lab to evaluate required voltage options. If other voltage options must be evaluated, a different part from the kit can be easily soldered onto one of the evaluation boards supplied with the kit.

The ADP2503CPZ-RedyKit is available with fixed 3.3 V and 5.0 V evaluation boards. The kit also contains additional parts for prototyping. The kit enclosure, which contains individually packaged parts and the two evaluation boards, is packaged in an ESD foam pad inside a treated cardboard box that measures 8.7" (L) × 7.9" (W) × 1.75" (H), that is, 22 cm (L) × 20 cm (W) × 4.5 cm (H).

The ADP2503 evaluation board data sheet, EVAL-ADP2503/ADP2504, can be found at [www.analog.com](http://www.analog.com).

## REDYKIT BILL OF MATERIALS

Table 1.

Qty	Model	Voltage	Maximum Current	Description
1	ADP2503-3.3-EVALZ	V <sub>OUT</sub> 3.3 V	N/A	Evaluation board
1	ADP2503-5.0-EVALZ	V <sub>OUT</sub> 5.0 V	N/A	Evaluation board
3	ADP2503ACPZ-2.8-R7	2.8 V	0.6 A	10-lead lead frame chip scale package (LFCSP_WD)
3	ADP2503ACPZ-3.3-R7	3.3 V	0.6 A	10-lead lead frame chip scale package (LFCSP_WD)
3	ADP2503ACPZ-3.5-R7	3.5 V	0.6 A	10-lead lead frame chip scale package (LFCSP_WD)
3	ADP2503ACPZ-4.2-R7	4.2 V	0.6 A	10-lead lead frame chip scale package (LFCSP_WD)
3	ADP2503ACPZ-4.5-R7	4.5 V	0.6 A	10-lead lead frame chip scale package (LFCSP_WD)
3	ADP2503ACPZ-5.0-R7	5.0 V	0.6 A	10-lead lead frame chip scale package (LFCSP_WD)

### ESD CAUTION

**ESD (electrostatic discharge) sensitive device.** Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

## NOTES

Evaluation boards are only intended for device evaluation and not for production purposes. Evaluation boards are supplied “as is” and without warranties of any kind, express, implied, or statutory including, but not limited to, any implied warranty of merchantability or fitness for a particular purpose. No license is granted by implication or otherwise under any patents or other intellectual property by application or use of evaluation boards. Information furnished by Analog Devices is believed to be accurate and reliable. However, no responsibility is assumed by Analog Devices for its use, nor for any infringements of patents or other rights of third parties that may result from its use. Analog Devices reserves the right to change devices or specifications at any time without notice. Trademarks and registered trademarks are the property of their respective owners. Evaluation boards are not authorized to be used in life support devices or systems.
