

U1782B SMD Tweezer

Overview & Features

Key Features & Specifications

- Length: 815mm
- Measurement Accuracy for Capacitance (Tweezers Open) $<0.7\text{pF}$, Resistance (Tweezers Short) $<0.5\Omega$, Inductance (Tweezers Short) $<1.2\mu\text{H}$
- Tweezer for testing capacitance, inductance or resistance of SMD components
- Guard ends to be connected to guard terminals of meter for better noise immunity

Description

The Agilent U1782B is a tweezer to be used with the U1700 Series Handheld Capacitor and Handheld LCR Meters. For better noise immunity, the tweezer has a GUARD end to be connected to the meter's GUARD terminal. The tweezer has redesigned with new shielded rigid cable to improve the usability and measurement stability.
